2008

2007

Notes: 1. Effective from fiscal 2007, Minebea has applied the Accounting Standard for Presentation of Net Assets in the Balance Sheet and the Implementation Guidance for the Accounting Standard for Presentation of Net Assets in the Balance Sheet. Accordingly, "shareholders' equity" and "return on shareholders' equity" have been restated as "net assets" and "return (net income) on equity," respectively. Also, figures after fiscal 2006 include minority interests in net assets.

^{2.} In fiscal 2006, Minebea restructured its PC keyboard business. As a consequence, the Company posted a business restructuring loss of ¥3,475 million in other expenses. The Company also showed an impairment loss of ¥967 million in other expenses resulting from the adoption of impairment accounting for fixed assets.

- 3. Effective from fiscal 2005, Minebea calculates free cash flow by subtracting net cash used in investing activities from net cash provided by operating activities. Figures for previous fiscal years have been restated using this calculation.
- 4. In fiscal 2003, significant declines in the prices of stocks listed on major markets resulted in the impairment of shares in financial institutions and losses on devaluation of investment securities amounted to ¥4,945 million. In line with projected losses resulting from its withdrawal from switching power supplies and related businesses, the Company posted losses on liquidation of switching power supplies and related businesses of ¥3,144 million. The Company also posted ¥1,206 million in environmental remediation expenses incurred by U.S. subsidiaries.
- 5. In fiscal 2001, to concentrate resources in its best areas and improve financial strength, the Company transferred its shares in subsidiary Actus Corporation, posting other income of ¥5,215 million in gains on sales of investment securities in affiliates. The Company also showed other expenses of ¥2,762 million, in line with the projected loss on the withdrawal from the wheel business.
- 6. In fiscal 2000, to concentrate resources in its core areas and improve financial strength, the Company made decisions with regard to the transferral of its shares, etc., in Minebea Credit Co., Ltd., a wholly owned subsidiary; the liquidation of different affiliated companies; and other matters. As a result, the Company showed ¥25,782 million in other expenses as losses on liquidation of subsidiaries and affiliates. The Company also applied tax effect accounting overall, which resulted in ¥6,276 million in deferred income tax benefit.
- 7. U.S. dollar amounts are translated from yen, for convenience only, at the rate of ¥93.04=US\$1, the approximate rate of exchange on March 31, 2010.

Outline

Outline of Operations

Minebea's operations are divided into two business segments: Machined Components and Electronic Devices and Components. The Machined Components segment focuses on miniature and small-sized ball bearings, rod-end and spherical bearings, and pivot assemblies. In the current fiscal year, this segment accounted for 46.9% of consolidated net sales. The Electronic Devices and Components segment encompasses precision small motors, notably HDD spindle motors and fan motors; PC keyboards and other electronic devices; lighting devices, including light-emitting diodes (LED) backlights for liquid crystal displays (LCDs); backlight inverters; speakers; and measuring components. This segment represented 53.1% of consolidated net sales in the current fiscal year.

Our product development efforts are centered in Japan, Germany, Thailand and the United States. Our manufacturing network encompasses bases in Thailand, China, Japan, the United States, Singapore, Malaysia, Slovakia and the United Kingdom. Our largest manufacturing base, in Thailand, accounted for 53.2% of total consolidated production in the current fiscal year, while our manufacturing base in China accounted for 19.3%. Combined production at all our bases in Asia (excluding Japan) represented 79.0% of total production. Production outside of Japan accounted for 92.0% of total production.

We supply products to a number of key markets. Notable among these are the PC and peripheral equipment, OA and telecommunications equipment, automotive, aerospace and household electrical appliances markets, which accounted for 31.3%, 13.0%, 11.8%, 11.0% and 9.5%, respectively, of the current fiscal year's consolidated net sales. Many of our clients—manufacturers of these products—are expanding production outside Japan, Europe, and the Americas, particularly in China and other parts of Asia, and therefore sales to Asia (excluding Japan) represented 53.1% of consolidated net sales. Our second-largest geographic market is Japan, which currently accounts for 24.1% of consolidated net sales. Remaining sales are to North, Central and South America and to Europe.

In the current fiscal year, the Company underwent organizational changes on June 1, 2009. Business headquarters were established for each product group, to organically link the functions of business departments and headquarters and maximize operational efficiency, as well as clarifying the operational results of each product category and sharing various technologies within similar product groups. Business headquarters are formed for similar business departments, and certain functions previously assumed by the headquarters, including manufacturing, technology, marketing and sales, and procurement, were transferred to the new business headquarters with an expected improvement in operational efficiency. As a result, the Company formed 5 business headquarters and 16 business departments attached to these business headquarters, 4 divisions that support these sectors, 2 divisions created by reorganizing the previous office management headquarters, and 1 main headquarter.

In April 2010, the European Motion Technologies (EMT) department was established, bringing the total to 17 business departments.

Principal Strategy

With the aim of evolving and growing as "a company that leads the competition through manufacturing and technological excellence," we continue to implement initiatives designed to reinforce profitability and increase corporate value by expanding implementation of our vertically integrated manufacturing system, as well as by establishing mass production facilities and well-appointed R&D facilities, in markets around the world

Recognizing innovation as the key to growth, we are addressing 3 priority tasks: developing new products, cultivating new markets and revolutionizing production technologies.

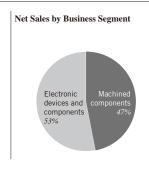

- 1. Ball bearings: To capitalize on untapped demand, we are taking steps to expand our production capacity and strengthen our development capabilities and production technologies for high-growth miniature ball bearings.
- 2. In response to the vigorous demand in the HDD-related market, we are pursuing a significant increase in the production of pivot assemblies and ball bearings.
- 3. Spindle motors: We endeavor to improve business performance by promoting cost reduction through increased production as well as meeting the market demand.
- 4. Precision components for aircraft applications: In this highly promising business, we are endeavoring to maximize growth by enhancing our existing rod-end bearings business, as well as by pushing forward with our expansion into large mechanical parts for aircraft, which incorporate sophisticated new processing technologies.
- 5. Fan motors and other precision small motors: We are stepping up efforts to expand our rotary components business into a second pillar of growth, alongside our core bearings and bearing-related products business.
- 6. In all product categories, we are increasing the weight of high-value-added products. At the same time, we are expanding our product lineup, thereby positioning us to respond to a broader range of market requirements.
- 7. We are reinforcing our ability to respond to pricing pressure and customer demands by reorganizing our business portfolio in a manner that enables us to surmount the barriers separating production, sales, technology and development functions to fully utilize our comprehensive strengths.
- 8. We are stepping up efforts to develop new markets and increase sales through the development of new "composite products" from the integration of technologies in electronic devices and machined components.
- 9. We are aggressively pursuing cost reduction efforts and strengthening our corporate structure to prepare for future expansion.

Financial Review

Results of Operations

Net Sale

Consolidated net sales in the current fiscal year fell 10.8%, or \(\frac{4}{27}\),717 million, to \(\frac{4}{228}\),446 million.

During the period, the Japanese economy experienced a persistent recession in the first half of the fiscal year due to the influence of the financial crisis that originated in the United States in 2008. However, the economic conditions in the latter half of the period showed improvement, despite the deflation concern, owing to the steady increase in exports to Asia and active fiscal policies. The U.S. economy also continued to weaken due to the harsh financial environment, but stabilized in the latter half of the period by virtue of the progress in inventory adjustment. The economies of Europe were also in a depressed state, but showed signs of bottoming out in the latter half of the period. In China, domestic demand steadily improved under the active public spending, while other parts of Asia also experienced an improvement in their economies.

In such a business environment, the Minebea Group has been dedicated to thorough cost reduction, development of high-value-added products and new technologies, and sales promotion activities in order to further increase profitability. Consolidated net sales decreased as compared with the previous fiscal year on account of the deteriorated market environment and drastic fluctuation in exchange rate (appreciation of yen) in the first half of the period.

Cost of Sales

Cost of sales declined 11.1%, or ¥21,852 million, to ¥175,286 million. Cost of sales as a percentage of net sales decreased by 0.3 percentage points, to 76.7%. The cost of sales was reduced owing to stringent cost cutting, declining sales due to worldwide recession, and fluctuations in exchange rates (appreciation of yen), together with the fall of raw material prices (steel).

SGA Expenses

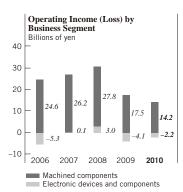

SGA expenses amounted to \(\frac{\pmathbf{4}}{4}\),101 million, down 9.9%, or \(\frac{\pmathbf{4}}{4}\),518 million. SGA expenses were equivalent to 18.0% of consolidated net sales, a slight increase by 0.2 percentage points compared to the previous fiscal year. The reduced SGA expenses were attributable to the ongoing efforts to reduce cost, as well as to the decline in sales due to the global recession and the fluctuating exchange rates (appreciation of yen).

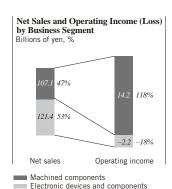

Cost of Sales and SGA Expenses

Operating Income Billions of ven 35 28 2007 2009 2010 2006 2008

Note: Percentages represent contribution by business segment to total.

Return (net income) on equity (right scale)

Operating Income

Operating income fell 10.0%, or \(\frac{1}{2}\),347 million, to \(\frac{1}{2}\),059 million. The first half of the fiscal year was impacted by the adverse impact on the manufacturing costs due to major production cutback conducted towards the end of the previous period. Although operating income increased significantly in the second half of the period by virtue of the recovery of demand and improvements in efficiency led by increased production, the overall operating income for the period declined. The operating margin rose 0.1 percentage point, to 5.3%. For more information, refer to "Performance by Business Segment."

Other Income (Expenses)

The net balance of other income and expenses (net amounts of non-operating profit/loss and extraordinary profit/loss) was expenses, i.e. a loss, of \(\frac{42}{798}\) million, which is \(\frac{43}{774}\) million less than the previous fiscal year. Interest expense declined \(\frac{4748}{4748}\) million, to \(\frac{41}{898}\) million, as a consequence of falling interest rates worldwide. Other major items were the product warranty loss of ¥511 million and the loss of ¥212 million on the sale/disposal of fixed assets. This amounted to a drastic decrease compared to the previous fiscal year, which we recorded significant losses on account of plant closure and others.

Income before Income Taxes and Minority Interests

Income before income taxes and minority interests for the current fiscal year totaled \$9,261 million, an increase by 35.5%, or \$2,427 million.

Income Taxes

Income taxes declined ¥1,974 million, to ¥2,249 million. This is comprised of current income taxes, that is, corporate, inhabitant and business taxes, of ¥4,051 million, refund of income taxes of ¥1,912 million and deferred income taxes of ¥110 million. The effective income tax rate improved to 24.3% from 61.8% due to the increase in income before income taxes and minority interests, and the effect of dividends income excluded from taxable income, etc.

Minority Interests

Minority interests amounted to \(\pm\)350 million, up \(\pm\)180 million from the previous fiscal year. This was primarily attributable to the improved earnings performance of the Minebea Motor Manufacturing Corporation joint venture.

Net Income

As a consequence of the aforementioned factors, net income increased to \(\frac{4}{6}\),662 million, which is a ¥4,221 million increase (172.9%) from the previous fiscal year. Basic net income per share was \(\frac{\pma}{17.20}\), up \(\frac{\pma}{11.02}\) from \(\frac{\pma}{6.18}\) in the previous fiscal year.

Financial Policy and Liquidity

In its various businesses where the Minebea Group operates, product and technological development is accelerating and global competition is intensifying. In such an environment, we recognize the importance of ensuring the flexibility in order to allow prior investment, which enable us to develop products that satisfy diverse customer expectations and lead the market, as well as capital investment promptly responding to demand fluctuations. To support these dynamic corporate activities and facilitate the strengthening of our technological development capabilities, we strive to maintain a sound financial position and a high degree of flexibility in our financing activities.

Under one of our primary management policies, namely the "reinforcement of financial structure," the Minebea Group has pursued shrinkage of assets, controlled capital investment and the reduction of liabilities. Given the uncertain financial conditions that encompass financial risks and increased interest rate burdens, we promoted efforts to expand income, shrink inventories and implemented an effective investment plan that focuses on the efficient use of assets, thereby reducing interest-bearing debt, to avoid these risks. As a result, we attained our midterm goal of keeping the net interest-bearing debt below ¥100,000 million. The net interest-bearing debt was ¥96,893 million as of the current fiscal year-end.

To ensure the agility of our financing efforts, we obtained ratings for short-term debt up to a maximum of \$10,000 million. To create a stronger, more stable structure for fund procurement, we strive to maintain solid relationships with key financial institutions in Japan and overseas and have taken steps to manage liquidity risks, including signing agreements to set up commitment lines of \$10,000 million.

Debt Ratings

As of May 2010	Long-term debt	Short-term debt
Moody's Investors Service	Baa2	_
Japan Credit Rating Agency, Ltd.	A	J-1
Japan Rating and Investment Information, Inc.	A-	a-1

Capital Investment

Capital investment in the current fiscal year totaled \(\pm\)1,081 million, down 45.1%, or \(\pm\)9,101 million, from the previous fiscal year. The breakdown of our capital investment is \(\pm\)5,529 million in the Machined Components segment and \(\pm\)5,552 million in the Electronic Devices and Components segment.

In the Machined Components segment, investments were made to rationalize production facilities for bearings and other products in Thailand, China, Singapore and the United States, and for facilities aimed at expanding production capacity for pivot assemblies. In the Electronic Devices and Components segment, investments were applied to new facilities for HDD spindle motors and electronic devices in Thailand and for information motors in Thailand, China and other.

Capital investment included investments in the purchase of intangible fixed assets (¥323 million) and in assets acquired through finance leases (¥316 million).

In response to the sharp decline in demand globally, deriving from the worldwide recession, we have strived for efficient investments. However, given the improving demand in the world, we will proactively expand our investments into growing business sectors. For the next fiscal year, we are planning a capital investment of \(\frac{\pmathbf{x}}{30,000}\) million, primarily in the businesses of pivot assemblies, spindle motors, LED backlights for LCD, and ball bearings.

Dividends

Our basic dividend policy gives priority to enhancing equity efficiency and improving returns to our shareholders, with dividends reflecting performance in light of the overall business environment, while maintaining stable and continuous distributions of profits.

It is also our policy to appropriate surplus earnings for the payment of cash dividends twice annually, at the interim and at the fiscal year-end. The year-end dividend is determined by way of a proposal that is voted on at the ordinary general meeting of shareholders, while the interim dividend is set by the Board of Directors.

In line with this policy, cash dividends for the current fiscal year were declared at \(\frac{4}{7}.00\) per share, including an interim dividend of \(\frac{4}{3}.00\) per share. As a result, the consolidated payout ratio for the current fiscal year was 40.7%.

Regarding the application of retained earnings, we will step up efforts to respond to changes in our operating environment by promoting efficient investments aimed at raising our cost competitiveness and reinforcing our technological and product development capabilities, thereby improving our responsiveness to market needs.

Free Cash Flow

Free Cash Flow

Billions of yen

25

20

15

5

Free cash flow (calculated by adding net cash flows from operating activities and net cash flows from investing activities) totaled \(\pm\)17,675 million, an increase of 41.3%, or \(\pm\)5,165 million, from the previous fiscal year.

Cash Flows from Operating Activities

Cash Flows from Investing Activities

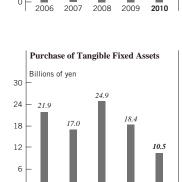

Net cash used in investing activities decreased 48.1%, or \$11,821 million, to \$12,733 million. This owes mostly to the fact that there was no payment for purchase of shares in subsidiaries in the current fiscal year, compared to \$7,265 million in the previous fiscal year, and that the payments for purchase of tangible fixed assets was \$10,495 million, which was \$7,934 million less than the previous fiscal year.

Cash Flows from Financing Activities

Net cash used in financing activities amounted to \$20,118 million, which was a \$13,143 million increase (188.5%) from the previous fiscal year. The main factor behind this change was the net decrease in short-term and long-term debt of \$14,128 million, decreased by \$17,336 million from the previous fiscal year.

Cash and Cash Equivalents

The balance of cash and cash equivalents at the end of current fiscal year was \(\frac{\pmathbf{2}}{24,855}\) million, a net decrease of \(\frac{\pmathbf{3}}{3,040}\) million, due to the free cash flow income falling below the net cash used in financing activities.

Free cash flow	17,675	12,510	23,432	22,722	9,117

Assets, Liabilities and Net Assets

2006

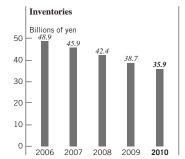

Total assets at the end of the current fiscal year amounted to \(\frac{\pmathbf{277}}{967}\) million, down 2.6%, or \(\frac{\pmathbf{77}}{7429}\) million, from the end of the previous fiscal year. This was primarily attributable to the reduced tangible fixed assets owing to holding down capital investment, reduced inventory, acquisition of treasury stock, and the reduced value of assets held by affiliates overseas when calculated in yen.

Total net assets came to ¥108,381 million, while the equity ratio was 38.5%, up 1.4 percentage points.

Net interest-bearing debt (total debt minus cash and cash equivalents and time deposits) decreased 11.9%, or ¥13,102 million, to ¥96,893 million. As a consequence, the net debt-to-equity ratio fell to 0.9 times.

Asset

Cash and cash equivalents decreased ¥3,040 million, to ¥24,855 million, compared to the previous fiscal year-end. Notes and accounts receivable—trade were up ¥8,829 million, to ¥52,184 million, reflecting the increase in net sales. Inventories decreased ¥2,825 million, to ¥35,912 million, on account of good sales and company-wide efforts to reduce inventories. Deferred tax assets (short-term) rose by ¥2,635 million, to ¥5,779 million.

As a result, total current assets increased by 6.8%, or \$8,305 million, to \$130,004 million. Total tangible fixed assets amounted to \$124,228 million, down 8.3%, or \$11,178 million. Purchase of tangible fixed assets for the current fiscal year totaled \$10,495 million, while depreciation and amortization amounted to \$21,140 million.

Total intangible fixed assets totaled ¥9,672 million, down 18.6%, or ¥2,210 million. Total investments and other assets were ¥14,063 million, down 14.3%, or ¥2,346 million, owing to a ¥1,196 million increase of investments in securities due to acquisition of preferred stock, etc. and a ¥3,056 million decrease in deferred tax assets (long-term).

Consequently, total fixed assets amounted to ¥147,963 million, a decrease of 9.6%, or ¥15,734 million.

Liabilities

Notes and accounts payable—trade were \$16,464 million, an increase of \$6,800 million compared to the previous fiscal year-end, due to increase of purchase led by increased production. Short-term loans payable decreased by \$7,235 million, to \$51,655 million. The current portion of long-term debt fell by \$9,000 million, to \$13,100 million. On the other hand, \$10,000 million of bonds were transferred to current liabilities. Owing to such factors, total current liabilities amounted to \$102,961 million, down 8.3%, or \$9,351 million.

Long-term debt increased by ¥1,745 million, to ¥58,645 million, by virtue of new borrowings. As a result, total long-term liabilities increased by 0.5%, or ¥303 million, to ¥66,625 million.

Net Assets

Total net assets increased by 1.5%, or \$1,619 million, to \$108,381 million, owing to a \$5,330 million increase in retained earnings, despite the increase in treasury stock by \$3,315 million. Minority interests in consolidated subsidiaries increased by 50.6%, or \$499 million, to \$1,485 million.

Financial Position

Note: Effective from fiscal 2007, Minebea has applied the Accounting Standard for Presentation of Net Assets in the Balance Sheet and the Implementation Guidance for the Accounting Standard for Presentation of Net Assets in the Balance Sheet. Accordingly, "shareholders' equity," "total shareholders' equity/total assets" and "shareholders' equity per share" have been restated as "net assets," "equity ratio" and "net assets per share," respectively.

Other Machined Components

Aerospace/automotive fasteners Special machined components Magnetic clutches and brakes Net sales in the Machined Components segment amounted to ¥107,088 million, down 7.6%, or ¥8,784 million, compared to the previous fiscal year. Operating income fell 18.5%, or ¥3,234 million, to ¥14,235 million, and the operating margin, calculated using sales to external customers, declined by 1.8 percentage points, to 13.3%. In spite of our pursuit of basic technologies, product technologies, and manufacturing technologies in the continuous effort to reduce costs, the operating income declined, suffering from the adverse impact on manufacturing costs caused by drastic output cuts undertaken towards the end of the previous fiscal year.

Principal Products and Applications and Minebea's Global Market Share

		Global Market
Principal Products	Principal Applications	Share*
Bearings and bearing-related products		
Miniature and small-sized ball bearings	Small motors, household electrical appliances, information and telecommunications equipment, automobiles, industrial machinery	60%
Rod-end and spherical bearings	Aircraft	50%
Pivot assemblies	HDDs	60%
Other machined components		
Special machined components, fasteners	Aircraft, automobiles,	
	industrial machinery	

^{*}Global market shares are in terms of units shipped, except the market share for rod-end and spherical bearings, which is in terms of sales value. Market shares are Minebea estimates based on information collected by the Company and by market research firms.

Business Activities and Ongoing Efforts

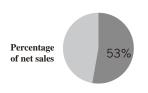

Sales of our mainstay products, i.e. ball bearings, rod-end bearings and spherical bearings, declined in comparison with the previous fiscal year due to deteriorated market conditions in the first half of the current fiscal year. However, in the latter half, sales increased by virtue of a market recovery combined with an efficiency improvement through increased production, contributing to a drastic profit improvement for the major products, notably ball bearings. In the first half of the period, the pivot assemblies segment experienced an increase in sales to the hard disk drive industry, which are our major customers, but sales leveled off due to the appreciation of the yen. However, in the second half of the period, sales increased due to vigorous market demand.

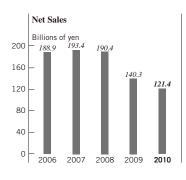

In the miniature and small-sized ball bearings business, we continued to lower manufacturing costs through streamlining and efforts to improve yield. In addition to strengthening this business, in line with the theme of returning to the basics of manufacturing, we sought to reinforce the development of basic technologies. To further reduce fixed costs, in April 2009, we closed the Skegness Plant of NMB-Minebea UK Ltd and shifted production machinery to our Shanghai plant. In the future, we plan to construct a new plant as well as endeavoring to increase production in order to meet the strong demand.

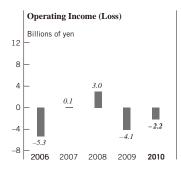

In the rod-end and spherical ball bearings business, we built a new production facility within the Karuizawa Plant and an aircraft part factory (for surface finishing) at the Fujisawa Plant, and commenced their operation, thereby positioning us to respond to the anticipated increase in demand from aircraft manufacturers. In addition to our existing rod-end and spherical bearings products, we are striving to enter the market for engine peripherals and large mechanical parts that incorporate sophisticated processing technologies.

In pivot assemblies, we continue to implement measures aimed at increasing productions and lowering the cost of sales by improving yield. Towards the future, we plan to build a new facility in consideration of the expanding HDD market.

Electronic Devices and Components

Principal Products

Rotary Components

HDD spindle motors Fan motors Hybrid-type stepping motors PM-type stepping motors Brush DC motors Vibration motors VR resolvers

Other Electronic Devices and Components

PC keyboards
Speakers
Electronic devices
Color wheels
Lighting devices for LCDs
Backlight inverters
Measuring components
Strain gages

Load cells

Net sales in the Electronic Devices and Components segment fell 13.5%, or \$18,933 million, to \$121,358 million, compared to the previous fiscal year. Given the decreasing sales, we implemented cost reduction efforts with a focus on motors. As a result, the segment recorded an operating loss of \$2,176 million, which is a \$1,887 million improvement to the operating loss of the previous fiscal year. The operating margin, calculated using sales to external customers, was -1.8%, indicating an improvement of 1.1 percentage points.

Principal Products and Applications and Minebea's Global Market Share

Principal Products	Principal Applications	Global Market Share*
Rotary components		
HDD spindle motors	HDDs	8%
Information motors (fan motors, stepping motors, brush DC motors, vibration motors)	PCs and servers, information and telecommunications equipment, household electrical appliances, cellular phones, automobiles, industrial machinery	2–20%, depending on product
Other electronic devices and component	S	
PC keyboards	PCs	3%
Lighting devices for LCDs	Cellular phones, digital cameras, portable digital information terminals	10%
Speakers	Audio equipment, PCs, automobiles	
Measuring components	Industrial machinery, automobiles, game consoles	_

^{*}Global market shares are in terms of units shipped. Market shares are Minebea estimates based on information collected by the Company and by market research firms.

Business Activities and Ongoing Efforts

In comparison to the previous fiscal year, the sale of LCD backlights increased due to sales promotions targeting the automobile industry and the recovery of demand in the mobile phone market. On the other hand, the sales of information motors and other motors declined due to the appreciation of the yen and the deterioration of market conditions in the first half of the current fiscal year. Regarding measuring components, sales in the market for game consoles declined.

Our efforts in the area of HDD spindle motors continue to focus on stepping up production and sales of high-growth, high-priced 2.5-inch models. We are also working to improve yields and R&D capabilities.

In the information motors business, we are introducing new products and pursuing synergy. The brushless DC motor products taken over from Panasonic Corporation joined our line of business in April 2010.

In the PC keyboards business, we are developing high-value-added products, lowering costs and enhancing efficiency.

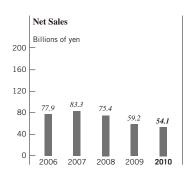

In the electronic devices business, we are expanding our lineup and production of small and medium-sized LED backlights, including LED backlights for in-vehicle LCD.

In the area of speakers, we are working to expand sales and to specialize in high added value products.

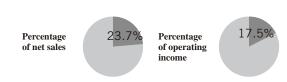

In the measuring components business, we are developing new products and markets.

Performance by Geographic Segment

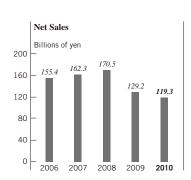

Japan

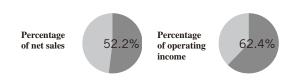

In Japan, the overall demand was stagnant and sales decreased by 8.6%, or \$5,089 million, to \$54,065 million. Despite the decline in sales, as a result of our efforts to cut costs and expenses, the operating income recorded an increase of \$845 million (67.0%), to \$2,106 million.

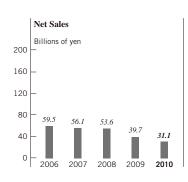

Asia (Excluding Japan)

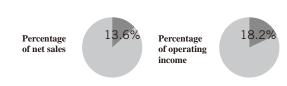

Asia includes the growing Greater China region, an important manufacturing base for many companies in Japan, Europe, and the United States. Impacted by the appreciation of yen and the slump in sales of ball bearings and information motors in the earlier half of the fiscal year, net sales declined 7.7%, or ¥9,910 million, to ¥119,333 million. The operating income fell 8.8%, or ¥723 million, to ¥7,525 million.

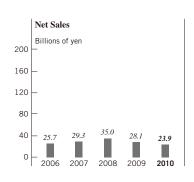

North America

In North America, sales of U.S.-manufactured ball bearings for aircrafts and rod-end bearings for aircraft-related industries were firm, but the appreciation of the yen and decrease in demand that occurred in the second half of the fiscal year pushed down the total sales for the fiscal year. Sales of PC keyboards and speakers, which we aim to specialize in high-value-added products, also declined. As a result, we reported, in North America, net sales of ¥31,137 million, down 21.5%, or ¥8,550 million, and an operating income of ¥2,200 million, a decrease of 22.4%, or ¥633 million.

Europe

In Europe, sales of all products slumped due to the global economic downturn. The Electronic Devices and Components segment particularly suffered from the worsened market conditions. Certain markets showed recovery in the second half of the fiscal year, but for the fiscal year as a whole the net sales declined 14.8%, or \$4,168 million, to \$23,911 million, and the operating income fell 78.6%, or \$836 million, to \$228 million.

Research and Development

Minebea manufactures and sells a wide range of products around the world. These include ball bearings and other precision components that apply its expertise in ball bearings; aircraft components, notably rod-end bearings and high-end fasteners; and electronic components used in state-of-the-art electronics equipment. Minebea and the companies of the Minebea Group also cooperate closely to conduct R&D in each of these fields. Furthermore, the Minebea Group is dedicated to the development of hybrid component products that integrate the element technologies from Machined Components and Electronic Devices and Components. In March 2010, Minebea released "COOL LEAF," a next generation input device produced through combining technologies cultivated in the process of design and development of keyboards (input devices), lighting devices (backlight module including light guide plate) and measuring components (force sensors).

Minebea has development bases in Japan (Karuizawa Plant and Hamamatsu Plant), Thailand, China, the United States, and Europe. These bases strive to leverage their particular expertise and promote complementary R&D with the aim of accelerating the development of products that will lead to the creation of new businesses. Our facilities in Karuizawa, Thailand and China have acquired accreditation for the ISO17025 standard and are stepping up efforts within the Minebea Group with regard to analyzing and reducing emissions of hazardous substances targeted by environmental regulations, including those banned by the European Union's Restriction of Hazardous Substances (RoHS) directive.

In the current fiscal year, R&D costs for the Minebea Group amounted to ¥8,410 million. This included ¥271 million allocated to basic research at material science laboratories in Thailand and China, such as basic materials analysis, and other research that cannot be apportioned to individual business segments.

R&D activities in our two segments in the current fiscal year are outlined below.

Machined Components

R&D in this segment focused on mainstay bearings, that is, on developing basic tribological technologies for materials and lubricants, among others, and on oil fill, electromechanical machining (ECM), diamond-like carbon (DLC) and other processes. Efforts are also emphasized on responding to the requirements of manufacturers in new areas in the IT, home electrical appliances, automobiles and aerospace industries through reliability engineering—aimed at, for example, minimizing particle generation, extending product life and enhancing electroconductivity—and applied engineering.

We are also working to develop ever-smaller miniature ball bearings. We succeeded in developing the world's smallest miniature ball bearings, boasting an outer ring diameter of 1.5 mm and an inner ring diameter of just 0.5 mm.

In the area of bearings for the aerospace industry, we have completed development of and received approval for tie-rod mechanical assemblies, trunnion bearings for main landing gear and a wide range of bearings for flight control systems for new models released by U.S. and European aircraft manufacturers, by applying technology used in our rod-end bearings.

The majority of HDDs now use perpendicular magnetic recording to achieve higher recording densities, and thus ensuring the cleanliness of components has become a crucial consideration. To offer a high level of cleanliness in our mainstay HDD-related products, which include bearing unit, spindle motors and base plates, we have actively developed clean manufacturing technologies.

The R&D cost in the Machined Components segment in the current fiscal year amounted to \(\frac{\pma}{2}\),287 million.

Electronic Devices and Components

Mainstay motors in this segment include fan motors, stepping motors, brush DC motors, brushless DC motors and HDD spindle motors. We are working to enhance our various core analysis technologies, control technologies and materials technologies, with the aim of being the first to launch advanced products that respond to customer requirements for compact size, high efficiency (low energy consumption), quietness and reliability, which vary depending on type of motor and application. In the area of stepping motors, we succeed in developing a unit with an external diameter of just 3.2mm–smaller than any other stepping motor in the world. This unit is currently undergoing assessment for a variety of applications. For magnetic application products, our R&D efforts emphasize materials technology, core technologies and product-related technologies. These efforts continue to yield such outstanding products as rare earth bond magnets and heat-resistant magnets for use in high-performance motors. We have successfully developed heat management system modules (HMSMs) by conducting R&D combining our motor, fan, electronics and other technologies.

In the area of display-related products, we developed a new high-brightness, high-efficiency LED back-light for LCDs, which we will market to manufacturers of cellular telephones and digital cameras. In addition to our noted ultra precision machining, mold production and molding technologies, we succeeded in developing plastics molding technologies capable of accommodating larger, thinner optical devices and increasingly fine optical patterns. This has positioned us to expand our focus to include LED backlights for notebook and desktop PC monitors, for which LCDs have become the preferred type of display.

In electronics-related products, we are developing backlight driving circuits for large-sized LCD TVs. Moreover, by shifting from analog to digital control circuits, we have succeeded in significantly reducing the number of parts used, as well as in improving control precision, thereby enabling us to reduce engineering lead times.

In the current fiscal year, R&D costs in the Electronic Devices and Components segment totaled ¥5,852 million.

Outlook for the Next Fiscal Year (Fiscal Year Ending March 2011) (as of May 2010) We expect that in the amid of the world economy showing signs of recovery mainly in Asia, the Japanese economy, in tune with U.S. and European economic recoveries, will be on the road to recovery with export improvements despite deflationary concerns. In Asia, we expect that the economies will remain strong despite concerns about the overheated economy in China. In the U.S., the economy is expected to move toward gradual recovery with the financial environment improving and corporate earnings ceasing to fall.

Under these circumstances, we expect net sales of 265,000 million yen, operating income of 23,500 million yen and net income of 12,500 million yen. This is due to expectations of increased sales by the brushless motor business to be newly added by a business acquisition implemented in the fiscal year; sales expansion in steady Asian markets; and increased sales to strong HDD-related markets.

Machined components business, we will continue to aggressively expand sales of mainstay ball bearings to the automobile and information & telecommunications equipment industries. By achieving economies of scale in manufacturing from this sales expansion and further reducing costs, we aim to improve business results further. We expect that sales of ball bearings will increase mainly in Asia due to economic recovery. Also in pivot assemblies, we expect increased sales due to active market demands.

Electronic devices and components business, in the information motor business, we will strive to further enhance results by continuing to improve production efficiency and to make product mix reviews. An increase in sales is expected due to the launch of a new business segment to sell brushless motor as a result of M&A we carried out during the current fiscal year. In the spindle motor business, we will strive to improve results mainly by responding to active market demands, making cost reduction efforts and boosting sales of 2.5" models. Also, in the PC keyboard business, we will aim for earnings improvement by focusing on high-quality, high-priced models and new input device products, etc. In LCD backlight assemblies, inverters, measuring components, etc., we will aim for sales recovery by expanding sales.

Risk Management

Minebea recognizes a variety of risks and uncertainties that have the potential to affect its operating results and/or financial position. On June 29, 2010, the date of our Japanese-language *Yuka Shoken Hokokusho*, the filing of which is required of all publicly traded companies in Japan, we recognized the following risks.

1. Market risk

Principal markets for Minebea products, including those for PCs and peripheral equipment, information and tele-communications equipment and household electrical appliances, are intensely competitive and subject to significant fluctuations in demand. Our operating results and financial position are vulnerable to these fluctuations.

2. Foreign exchange risk

A significant portion of our consolidated net sales and production are outside of Japan. Our business is thus vulnerable to risks associated with fluctuations in foreign currency exchange rates. We have entered into various currency exchange contracts and other derivatives transactions to hedge these risks, but fluctuations in foreign currency exchange rates may affect our operating results and/or financial position over the long term.

3. R&D risk

While we focus on R&D to introduce a constant stream of new, high-quality products, we are subject to the risk that significant R&D expenditures may not be rewarded with successes, as there are no guarantees that R&D efforts will come to fruition.

4. Legal risk

The Legal Department is responsible for managing risk related to lawsuits and other legal actions brought against Minebea Group operations in Japan and/or overseas. We are subject to the risk that lawsuits or other actions with the potential to affect our operating results and/or financial position may be brought against us in the future.

5. Risk related to price negotiations

We continue to face intense competition from lower-priced products made overseas. We are subject to the risk that we will be unable to maintain or increase our share should market needs shift to low-quality, low-priced products.

6. Risk related to raw materials and logistics costs

We purchase a variety of materials from external suppliers and strive to ensure optimal purchase inventory volumes for such materials and access to stable supplies of materials with stable prices. However, we are subject to the risk that rising prices for such materials may affect our operating results and/or financial position in the future.

7. Latent risk related to operations overseas

The Minebea Group's manufacturing activities are conducted primarily in Thailand, China, and Singapore. While considerable time has passed since we established operations in these countries, our operations overseas are subject to the following risks, any of which may have a negative impact on our operating results and/or financial position:

- (a) Unexpected changes to laws or regulations.
- (b) Difficulty in attracting and securing appropriate human resources.
- (c) Acts of terrorism or war, or other acts that may cause social disruption.

1. Basis of Presenting Financial Statements

The accompanying consolidated financial statements of Minebea Co., Ltd. (the "Company"), and its consolidated domestic and overseas subsidiaries are stated in Japanese yen, the accounts of which are maintained in accordance with the accounting principles generally accepted in the respective countries and audited by independent auditors in those countries. The Company has made necessary adjustments to its consolidated accounting process regarding overseas subsidiaries to accommodate the application of the Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements (ASBJ Practical Issues Task Force (PITF) No. 18, issued on May 17, 2006), effective from the year ended March 31, 2009.

The accompanying consolidated financial statements have been compiled from the consolidated financial statements filed with the Ministry of Finance in Japan as required by the Financial Instruments and Exchange Law of Japan, in accordance with accounting principles generally accepted in Japan, which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards. For the purpose of this annual report, certain reclassifications have been made and additional information provided to present the accompanying consolidated financial statements in a format that is familiar to readers outside Japan.

2. Summary of Significant Accounting Policies

a) Principles of consolidation

The accompanying consolidated financial statements include the accounts of the Company and 39 affiliated companies, including 38 consolidated subsidiaries and 1 equity-method affiliate. All significant intercompany balances, intercompany transactions and unrealized profits have been eliminated in consolidation.

In the year ended March 31, 2010, the Company liquidated 1 subsidiary.

For certain subsidiaries that have a fiscal year-end of December 31, provisional financial statements are prepared as of the Company's balance sheet date. In the year ended March 31, 2010, the balance sheet date for myonic Holding GmbH, myonic GmbH, myonic Limited and myonic s.r.o. was changed from December 31 to March 31.

b) Translation of foreign currencies

Monetary assets and liabilities denominated in overseas currencies are translated into Japanese yen at the exchange rates prevailing at the balance sheet date, except for certain accounts that were hedged by forward exchange contracts. Translation differences arising from the translation of the financial statements denominated in foreign currencies are recorded as minority interests in consolidated subsidiaries and foreign currency translation adjustments in net assets.

Financial statement items of consolidated overseas subsidiaries are translated into Japanese yen as follows:

Balance sheet items At the rates of exchange prevailing at the balance

sheet date

Statement of income items At the average rate of exchange during the fiscal year

c) Cash equivalents

All highly liquid investments with a maturity of three months or less when purchased are considered to be "cash equivalents."

d) Allowance for doubtful receivables

Allowance for doubtful receivables of the Company and its consolidated domestic subsidiaries is provided for normal receivables based on the historical write-off rate and for uncollectible receivables on a specific identification basis. Allowance for doubtful receivables of consolidated overseas subsidiaries is generally provided for estimated uncollectible receivables.

Allowance for doubtful receivables provided for consolidated subsidiary receivables is eliminated for consolidation purposes.

e) Inventories

Inventories of the Company and its consolidated domestic subsidiaries are stated at cost, as determined mainly by the moving average method, with balance sheet inventory amounts calculated using lowered book values, reflecting a potential decline in profitability. Inventories of the Company's consolidated overseas subsidiaries are stated at the lower of cost or market as determined by the first-in, first-out method or the moving average method.

(Change of accounting policy)

Until the year ended March 31, 2008, inventories held for ordinary sales have been calculated at cost by mainly using the moving average method. However, owing to the application of the Accounting Standard for Measurement of Inventories (Accounting Standards Board of Japan (ASBJ) Statement No. 9, issued on July 5, 2006), from the year ended March 31, 2009, inventories are calculated at cost by mainly using the moving average method, with balance sheet inventory items calculated using lowered book values.

This resulted in a decrease of ¥228 million in operating income and income before income taxes and minority interests for the year ended March 31, 2009, respectively.

Inventories as of March 31, 2010 and 2009, comprised the following:

Inventories

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2010	2009	2010
Merchandise and finished goods	¥15,297	¥16,840	\$164,416
Work in process	11,037	11,506	118,621
Raw materials	6,729	7,246	72,321
Supplies	2,849	3,145	30,624
	¥35,912	¥38,737	\$385,982

f) Tangible fixed assets

Tangible fixed assets are stated at acquisition cost. Depreciation of the Company and its consolidated domestic subsidiaries is computed by the declining balance method based upon the estimated useful lives of the assets. The estimated useful lives of fixed assets are predominantly 2 to 50 years for buildings and structures, 2 to 15 years for machinery and transportation equipment and 2 to 20 years for tools, furniture and fixtures. In contrast, depreciation of consolidated overseas subsidiaries is computed primarily by the straight-line method based upon the estimated useful lives of the assets. Maintenance and normal repair expenses are charged against income as incurred, while significant renewals and improvements are capitalized.

(Additional information)

In the year ended March 31, 2009, the Company reassessed the useful lives of its machinery and equipment concurrent with a review of depreciation methods implemented as a result of revisions to tax legislation in year 2008. As a consequence, the useful lives of certain machinery and equipment are different effective from the year ended March 31, 2009. This resulted in a decrease of ¥32 million in operating income and income before income taxes and minority interests for the year ended March 31, 2009, respectively.

g) Investments in securities

Investments in securities consist of equity securities of listed and unlisted companies and government bonds. Available-for-sale securities held by the Company or its domestic or overseas consolidated subsidiaries with fair value are stated at the closing quoted market price on March 31, 2010 and 2009. Resulting valuation gains and losses are included, after the application of tax effect accounting, in net assets in the consolidated balance sheets. The cost of securities sold is calculated using the moving average method. Those securities that fair value are not readily determinable are stated at cost, as determined by the moving average method.

Available-for-sale securities

Available-ioi-sale securities					Mil	lions of yen
		2010			2009	3,7
	Reported amount in balance sheet	Acquisition cost	Difference	Reported amount in balance sheet	Acquisition cost	Difference
Securities whose reported amounts in balance sheet exceed acquisition cost Equity securities Bonds	¥1,907 2,539	,	¥381 5		¥ — 2,504	¥ <u></u>
Securities whose reported amounts in balance sheet do not exceed acquisition cost Equity securities Bonds	1,260 —	1,524 —	(264) —	2,889	3,082	(193)
Total	¥5,706	¥5,584	¥ 122	¥5,432	¥5,586	¥(154)
				Thousands	s of U.S. dolla	ars (Note 3)
					2010	
				Reported amount in balance sheet	Acquisition cost	Difference
Securities whose reported amounts exceed acquisition cost Equity securities Bonds	s in balan	ce sheet		\$20,498 27,288	\$16,401 27,241	\$ 4,097 47
Securities whose reported amounts do not exceed acquisition cost Equity securities Bonds	s in balan	ce sheet		13,543 —	16,378 —	(2,835)
Total				\$61,329	\$60,020	\$ 1,309

Unlisted equity securities are not included in the above, as they do not have quoted market prices, therefore they are extremely difficult to measure their fair value. The amount of unlisted equity securities as of March 31, 2010 and 2009 are \$2,531 million (\$27,211 thousand) and \$1,531 million, respectively.

Available-for-sale securities sold during each fiscal year

h) Accounting for retirement benefits

Effective April 1, 2000, the Company and its consolidated domestic subsidiaries have adopted the accounting standards for retirement benefits. To provide for the payment of retirement benefits to employees, the Company has made provisions based on the projected benefit obligations and the estimated plan assets as of March 31, 2010 and 2009, calculated on the basis of accrued retirement benefit obligations and prepaid pension costs as of March 31, 2010 and 2009.

Prepaid pension costs and accrued retirement benefits as of March 31, 2010 and 2009, are included in "Other" in "Investments and Other Assets" and "Other" in "Long-term Liabilities", respectively.

Prior service costs are amortized using the straight-line method over a period of 10 years. Actuarial gains and losses are amortized using the straight-line method over a period of 5 years, from the period subsequent to the period in which they are incurred.

Unrecognized prior service costs of consolidated overseas subsidiaries are amortized using the straight-line method over a period of 10 years.

Actuarial gains and losses of consolidated overseas subsidiaries are amortized using the straight-line method over a period of 5 to 10 years, from the period subsequent to the period in which they are incurred.

(Change of accounting policy)

In the year ended March 31, 2010, the Company adopted the "Partial Amendments to "Accounting Standards for Retirement Benefits" (Part3)" (ASBJ Statement No. 19, issued on July 31, 2008).

There was no effect of this change on profits and losses for the year ended March 31, 2010.

(Additional information)

Effective April 1, 2008, the Company and certain consolidated domestics subsidiaries terminated the tax-qualified pension plan it had previously employed and switched to a defined contribution pension plan and a defined benefit pension plan. Accordingly, the Company has applied the Guidance for Accounting for the Transfer between Retirement Benefit Plans (ASBJ Guidance No. 1, issued on January 31, 2002).

Unrecognized prior service costs resulting from this change are amortized using the straight-line method over a period of 10 years.

Retirement benefit plans

Projected benefit obligations and the components thereof as of March 31, 2010 and 2009, are as follows:

	Millions of yen	Thousands of U.S. dollars (Note 3)
Projected Benefit Obligations	2010 2009	2010
Projected benefit obligations Plan assets at fair value	¥(33,511) ¥ (29,725) 21,816 17,741	\$(360,183) 234,480
Unfunded projected benefit obligations Unrecognized prior service costs Unrecognized actuarial losses	(11,695) (11,984) 2,647 2,978 4,519 4,758	(125,703) 28,451 48,569
Net amount recognized on consolidated balance sheets Prepaid pension costs	(4,529) (4,248) 278 873	(48,683) 2,986
Accrued retirement benefits	¥ (4,807) ¥ (5,121)	\$ (51,669)

Net retirement benefit costs used for calculation for the years ended March 31, 2010, 2009 and 2008, are as follows:

		Mill	ions of yen	Thousands of U.S. dollars (Note 3)
Net Retirement Benefit Costs	2010	2009	2008	2010
Service cost	¥1,372	¥ 1,433	¥ 1,279	\$14,742
Interest cost	1,207	1,187	1,266	12,976
Expected return on plan assets	(833)	(1,050)	(1,403)	(8,954)
Amortization of prior service costs	333	332	2	3,576
Amortization of actuarial losses (gains)	1,392	281	(311)	14,964
Retirement benefit costs	¥3,471	¥ 2,183	¥ 833	\$37,304
Loss on transition of retirement benefit plan	_	375	_	_
Special severance payments	_	985	165	_
Contributions to defined contribution pension plans	159	143		1,711
Total	¥3,630	¥ 3,686	¥ 998	\$39,015

Other than the above retirement benefit costs, in the year ended March 31, 2008, we posted ¥116 million in retirement benefit costs for overseas subsidiaries in other expenses.

Assumptions used for calculation for the years ended March 31, 2010, 2009 and 2008, are as follows:

Assumptions Used for Calculation	n 2010	2009	2008
Discount rate	mainly 2.0%	mainly 2.0%	mainly 2.5%
Expected rate of return on plan assets	mainly 2.0%	mainly 2.5%	mainly 2.5%
Allocation of estimated amount of all retirement benefits to be paid at future retirement dates	Equally to each service year using the estimated number of total service years	Equally to each service year using the estimated number of total service years	Equally to each service year using the estimated number of total service years

i) Leases

Non-cancellable finance lease transactions except for those that stipulate the transfer of ownership of the leased property to the lessee are depreciated using the straight-line method, whereby the lease term is the depreciable life of the asset and the salvage value is zero.

(Change of accounting policy)

Until the year ended March 31, 2008, the Company has accounted for finance leases, except those that stipulate the transfer of ownership of the leased property to the lessee, using the same accounting method as for rental agreements. In the year ended March 31, 2009, however, the Company adopted the same accounting method as for ordinary sales transactions, in line with the Accounting Standard for Lease Transactions (ASBJ Statement No. 13, issued on June 17, 1993, and revised on March 30, 2007), and the Guidance on Accounting Standards for Lease Transactions (ASBJ Guidance No. 16, issued on January 18, 1994, Accounting System Committee of the Japanese Institute of Certified Public Accountants, and revised on March 30, 2007).

The effect of this change was insignificant for the year ended March 31, 2009.

i) Hedge accounting

Method of hedge accounting

The Company has adopted the allocation method to account for the forward exchange contracts for foreign currency-denominated receivables and payables, and the deferred hedge method to account for the forward exchange contracts for foreign currency-denominated anticipated transactions. The Company has also adopted the special method to account for the interest rate swaps, which meet the requirements of special accounting.

Hedging vehicles and hedged items

(Hedging vehicles)

Forward exchange contracts

Interest rate swaps

(Hedged items)

Monetary receivables and payables in foreign currency

Anticipated transaction in foreign currencies

Interest rates on borrowings

Hedge policy

Under the guidance of its Finance Department, the Company makes forward exchange contracts to hedge risks in foreign exchange fluctuations arising from export and import transactions, and from lending in foreign currency. The Company also makes interest rate swaps to hedge fluctuation risks in interest rates on borrowings.

Method of assessing hedge effectiveness

Regarding forward exchange contracts, in principle, the Company allocates them to monetary receivables and payables with same maturities and same amounts in foreign currency at closing of forward exchange contracts in accordance with the risk management policy. This completely ensures correlations reflecting subsequent exchange rate fluctuations. The Company assesses hedge effectiveness based upon such correlations. Also, regarding interest rate swaps, the Company assesses hedge effectiveness based upon the fulfillment of the accounting requirements for special treatment.

k) Goodwill and negative goodwill

Excess of cost over net assets acquired for business acquisitions for the Company and its consolidated subsidiaries is amortized, amounting to ¥1,059 million for the year ended March 31, 2008, on a straight-line basis over a period ranging from 5 to 40 years in accordance with accounting procedures in their respective countries of domicile. For the year ended March 31, 2010 and 2009, the amount was ¥1,352 million (\$14,533 thousand) and ¥1,039 million, respectively, which is amortized on a straight-line basis over a period ranging from 5 to 10 years.

I) Current accounting for overseas subsidiaries

The Company has made necessary adjustments to its consolidated accounting process to accommodate the application of the Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements (ASBJ Practical Issues Task Force (PITF) No. 18, issued on May 17, 2006), effective from the year ended March 31, 2009.

This resulted in an increase of ¥217 million in operating income and income before income taxes and minority interests, respectively.

m) Change in classification

Until the year ended March 31, 2008, income from scrap sales has been included primarily in other income, as the amount incurred was minor. However, the materiality of the incurred amount has increased recently. With improvement of management system, accurate segmentation has become possible, and the Company changed its treatment of income from scrap sales from the year ended March 31, 2009, deducting it from cost of sales rather than including it in other income.

This resulted in a decrease of \(\frac{\pmathbf{Y}}{223}\) million in cost of sales and other income, respectively, and corresponding increases in gross profit and operating income, but had no impact on income before income taxes and minority interests for the year ended March 31, 2009.

n) Reclassifications

Certain reclassifications of previous years' figures have been made to conform with the current year's classification.

3. Translation into U.S. Dollars

The accompanying financial statements are expressed in Japanese yen and, solely for the convenience of the reader, have also been translated into U.S. dollar amounts at the rate of ¥93.04=US\$1, the approximate rate of exchange on March 31, 2010. The translations should not be construed as representations that the Japanese yen amounts have been, could have been or could in the future be converted into U.S. dollars.

4. Short-Term Loans Payable and Long-Term Debt

Short-term loans payable consists of notes payable to banks, principally due in 30 to 180 days. The weighted average rates of short-term loans as of March 31, 2010 and 2009 are 1.06% and 1.44%, respectively.

Short-term loans payable as of March 31, 2010 and 2009, consists of the follows:

	1	Millions of yen	Thousands of U.S. dollars (Note 3)
	2010	2009	2010
Notes payable to banks	¥51,655	¥58,890	\$555,196
Total	¥51,655	¥58,890	\$555,196

Long-term debt as of March 31, 2010 and 2009, consists of the following:

	Millions of yen		U.S. dollars (Note 3)	
	2010	2009	2010	
1.39% unsecured bonds payable in Japanese yen due November 2010 1.26% unsecured bonds payable in Japanese yen	¥10,000	¥10,000	\$107,481	
due December 2011 1.70% unsecured bonds payable in Japanese yen	10,000	10,000	107,481	
due March 2012	1,500	1,500	16,122	
0.85% to 2.05% loans from banks, other	50,245	57,500	540,035	
Lease obligations	963	1,988	10,358	
Less current portion	72,708 13,571	80,988 22,958	781,477 145,867	
	¥59,137	¥58,030	\$635,610	

The aggregate annual maturities of long-term debt outstanding as of March 31, 2010, are as follows:

	Millions of yen	Thousands of U.S. dollars (Note 3)
2011	¥13,571	\$145,867
2012	22,885	245,970
2013	13,723	147,493
2014	18,154	195,124
2015 and thereafter	4,375	47,023
	¥72,708	\$781,477

5. Losses on Impairment of Fixed Assets

The asset groups for which the Company recognized impairment losses for the years ended March 31, 2010, 2009 and 2008, are as follows:

Losses on impairment

			Millions of yen	Thousands of U.S. dollars (Note 3)
Use	Location	Type of assets	2010 2009 2008	2010
Idle assets	5 facilities, which are a plant in Malaysia, former Kyoto Plant, former Ibaraki Plant former Ichinoseki Plant and	Buildings and structures Machinery and transportation	¥ 7 ¥— ¥—	\$ 77
	former Kanegasaki Plant	equipment	— 19 —	_
	(Yawata City, Kyoto	Land	24 4 72	261
	Prefecture and others)	Total	¥31 ¥23 ¥72	\$338

Method to group the assets

Assets are generally grouped by the lowest level that generate independent cash flow, based on the business segmentation.

Reason for impairment losses having been recognized

The fixed assets (buildings and structures, machinery and transportation equipment, land and others) for which impairment losses were recognized for the years ended March 31, 2010, 2009 and 2008, are currently idle assets and are not expected to be utilized effectively. In addition, the land price dropped significantly.

Method to calculate the recoverable amounts

The recoverable amounts were measured by the net realizable value, which is mainly based on real estate valuation standards. Assets that cannot be sold or diverted to other usage are valued at zero.

6. Income Taxes

The Company and its consolidated domestic subsidiaries are subject to a number of different taxes based on income which, in the aggregate, resulted in an effective statutory rate of 39.0% for the years ended March 31, 2010, 2009 and 2008.

The income taxes of consolidated overseas subsidiaries are generally levied at lower rates than those currently applied in Japan. In addition, consolidated subsidiaries in Thailand are granted a tax exempt status by the Promotion of Investment Act, whereby earnings derived from the manufacture or sale of qualifying products are fully exempt from Thai income tax for a period of 3 to 8 years.

The income tax effect is recognized for temporary differences resulting from elimination of intercompany profit and certain adjustments made in the accompanying consolidated financial statements.

Net deferred tax assets of ¥9,546 million (\$102,602 thousand) and ¥10,009 million as of March 31, 2010 and 2009, respectively, are included in the accompanying consolidated balance sheets and are composed of the following:

	Mil	llions of yen	Thousands of U.S. dollars (Note 3)
Deferred Tax Assets	2010	2009	2010
Excess of allowed limit chargeable to accrued bonuses Excess of allowed limit chargeable to	¥ 970	¥ 860	\$ 10,428
reserve for retirement benefits	1,563	1,772	16,796
Loss on revaluation of investment securities	351	363	3,773
Unrealized gains on sales of inventories	968	755	10,407
Unrealized gains on sales of fixed assets	732	928	7,870
Excess of allowed limit chargeable to depreciation	1,510	1,246	16,230
Impairment loss	405	129	4,353
Tax losses carried forward	4,648	3,343	49,961
Foreign tax credit carried forward	1,458	1,086	15,671
Others	1,891	1,733	20,318
Subtotal	14,496	12,215	155,807
Valuation allowance	(3,480)	(690)	(37,401)
Total deferred tax assets	¥11,016	¥11,525	\$118,406
	M:	llions of yen	Thousands of U.S. dollars (Note 3)
Deferred Tax Liabilities	2010	2009	2010
Depreciation allowed to overseas subsidiaries Differences on revaluation of available-for-sale securities	¥1,149 37	¥ 1,077	\$ 12,356
	37 37	27 333	393 400
Prepaid pension costs Others	247	333 79	2,655
Total deferred tax liabilities	1,470	1,516	15,804
Net deferred tax assets	¥9,546	¥10,009	\$102,602

Net deferred tax assets are included in the accompanying consolidated balance sheets as follows:

Millions of yen	Thousands of U.S. dollars (Note 3)
2010 2009	2010
¥ 5,779 ¥ 3,144	\$ 62,115
4,923 7,979	52,918
(12) (16)	(133)
(1,144) (1,098)	(12,298)
¥ 9,546 ¥10,009	\$102,602
	2010 2009 ¥ 5,779 ¥ 3,144 4,923 7,979 (12) (16) (1,144) (1,098)

The reconciliation of the statutory tax rate in Japan and the effective tax rates appearing in the consolidated statements of income for the years ended March 31, 2010, 2009 and 2008, is shown below:

	2010	2009	2008
Statutory tax rate in Japan	39.0%	39.0%	39.0%
Adjustments:			
Amortization of goodwill	5.7	5.9	1.2
Difference of rates applied to overseas subsidiaries	(18.1)	(8.9)	(12.9)
Valuation allowance for operating losses of			
consolidated subsidiaries	3.7	_	(4.3)
Effect of dividend income eliminated for consolidation	29.1	57.4	8.3

for tax purposes	(22.7)	_	_
Changes in tax rates	_	(16.7)	_
Prior year's income taxes	_	(15.0)	_
Income tax refund	(20.6)	_	_
Withholding income taxes	5.8	_	_
Other	2.4	0.1	0.0
Effective income tax rate	24.3%	61.8%	31.3%

7. Leases

Pro forma information for finance leases, except lease agreements which stipulate the transfer of ownership of the leased assets to the lessee, is as follows:

Actual lease payments and depreciation expense

	Millions of yen
	2008
Actual lease payments	¥1,144
Depreciation	1,144

Depreciation of leased assets is computed on the straight-line method over the lease term with no residual value.

No impairment losses have been allocated to leased assets.

Outstanding future lease payments for non-cancellable operating leases, is as follows:

	<i>M</i> .	illions of yen	Thousands of U.S. dollars (Note 3)
	2010	2009	2010
Due within 1 year Due after 1 year	¥ 842 1,305	¥—	\$ 9,045 14,030
Total	¥2,147	¥—	\$23,075

8. Financial Instruments

a) Qualitative information on financial instruments Financial instrument policies

The Company procures necessary funds (mainly through bank loans and issuance of bonds) based on the capital investment plan. Temporary surplus funds are managed in highly liquid financial assets and short-term operating funds are procured through bank loans. Derivatives are utilized to avoid the risks mentioned subsequently, and speculative trading is not included in the policy.

Details of financial instruments and its risks

Notes and accounts receivable, which are trade receivables, are exposed to credit risk deriving from clients. On the other hand, trade receivables in foreign currency produced in overseas business operations are subject to the risk of exchange rate fluctuations, although basically, are hedged using forward exchange contracts, other than those within the balance of the foreign currency trade accounts payable.

Securities and investments in securities are bonds and equity securities of companies with business relations, and are categorized as available-for-sale securities. These securities are exposed to the risk of market price fluctuation. Long-term loans receivable are also provided to employees.

Notes and accounts payable, which are trade payables, are mostly due within 6 months.

Foreign currency trade accounts payable are exposed to the risk of exchange rate fluctuations, but are hedged using forward exchange contacts, other than those within the balance of the foreign currency trade accounts receivable.

Borrowings, bonds, and lease obligations concerned with finance lease transactions primarily serve the purpose of financing for capital investment, and the redemption date is up to 7 years from the balance sheet date. A part of these are exposed to the risk of interest rate fluctuations, but are hedged by derivative transactions (interest rate swap transactions).

Derivative transactions include the forward exchange contract transactions that are intended to hedge against the fluctuation risks for trade receivables and payables in foreign currency and the interest rate swap transactions that are intended to hedge the fluctuation risks in the interest rates of its borrowings.

Risk management for financial instruments

• Management of credit risks (risks of clients' failure to perform contracted obligations) The Sales Division & Administration Department of the Company periodically monitors the status of major clients regarding trade receivables based on the Company's credit management policies. In addition, the Office manages the payment due date and outstanding amount per client every month, as well as annual revisions of credit ratings and credit limits for early discovery and reduction of uncollectable receivables due to deteriorated financial conditions and such. Similar management is conducted at consolidated subsidiaries in keeping with the Company's credit management policies.

As for bonds categorized as available-for-sale securities, according to the fund management policy, the Company only handles U.S. Treasury securities and thus the credit risks are not significant.

Derivative transactions are deemed to have remote credit risk, as the Company limits making such transactions with highly rated and reliable financial institutions.

• Management of market risks (fluctuation risks in exchange rates and interest rates, etc.) In principle, the Company uses forward exchange contracts to hedge against the fluctuation risks in foreign currency exchange rates by month and by currency for trade receivables and payables in foreign currency. The Company also adopts forward exchange contracts for foreign currency-denominated receivables and payables that are certain to arise from anticipated export transactions. The Company makes interest rate swap transactions to reduce risks of interest rate fluctuations from the repayment of its borrowings and bonds.

For securities and investment securities, fair values and the financial conditions of issuing entities (client firms) are periodically reviewed.

Based on the approval of the authorized personnel, the relevant department executes and manages derivative transactions according to the marketability risk management policies that specify transaction authorities and transaction amount limits. The monthly transaction results are reported to the executive officer in charge of finance of the Company.

Consolidated subsidiaries are also managed in pursuant to the Company's marketability risk management policies.

• Management of liquidity risks in financing (risks of failure to pay by payment due date) The Company manages liquidity risks through the maintenance of short-term liquidity. The relevant departments of the Company create and update cash flow plans as necessary based on reports from each departments. Similar management is also implemented in consolidated subsidiaries.

Supplemental information on fair values of financial instruments

The fair values of financial instruments include both the amount based on market price, and when market price is not available, the amount is rationally calculated. Due to the integration of fluctuation factors in the calculation of such amount, the amount may vary depending on which preconditions are adopted. The contracted amount in derivative transactions mentioned in the note "9. Derivatives" do not in themselves represent the market risks in the derivative transactions.

b) Fair values of financial instruments

The reported amounts in the consolidated balance sheet, fair values and their differences as of March 31, 2010 are as follows, which does not contain items whose fair value was extremely difficult to measure.

				Milli	ons of yen		Thousand	s of	U.S. dollar.	s (Note 3)
			2	010				2	2010	
		Reported amount in balance sheet		Fair value	Difference		Reported amount in balance sheet		Fair value	Difference

Derivative transactions*	¥	28	¥	28	¥ —	\$	301	\$	301	\$ —

^{*} Net receivables and payables deriving from derivative transactions are offset.

Calculation of fair value of financial instruments and matters related to securities and derivative transactions are as follows.

Assets

- Cash and cash equivalents Time deposits Notes and accounts receivable—trade Book values are applied, as these items are settled in a short period, and their book values approximate fair values.
- Securities and investments in securities

Fair values for these items are based on market prices or by prices provided by the financial institution for bonds, and based on market prices for equity securities. Please refer to the note "2. Summary of Significant Accounting Policies g) Investments in securities" for the details of securities by each holding purposes.

Liahilities

- Notes and accounts payable—trade Short-term loans payable Book values are applied, as these items are settled in a short period, and their book values approximate fair values.
- Current portion of long-term debt Long-term debt

As for loans payable, book values are applied for those with floating interest rates, as they are settled in a short period, and their book values approximate fair values. For those with fixed interest rates, sum of the principal and interests are discounted using the rate assumed when a similar borrowing is made.

As for bonds, those with market prices are based on such market prices, and for those with no market prices, sum of the principal and interests are discounted using the rate assumed when a similar issuance is made.

Derivative transactions

Please refer to the note "9. Derivatives".

Financial instruments whose fair value is extremely difficult to measure

	Millions of yen	Thousands of U.S. dollars (Note 3)
	2010	2010
	Reported amount in balance sheet	Reported amount in balance sheet
Unlisted stocks	¥2,531	\$27,211

The above item is not included in "Securities and investments in securities" as it does not have a market price and is deemed extremely difficult to measure its fair value.

Interest rate swap transaction Floating/fixed rate cash flow	Long-term debt	\$406.277	\$377.257	\$(6,122)	

Note: Calculation of fair values

Fair values are calculated based on the prices provided by financial institutions.

Fair values of derivatives that special accounting for interest rate swaps are applied are included in the fair values of long-term debt, as they are accounted for as a unit with their hedging vehicles.

10. Research and Development Expenses

Research and development expenses incurred by the Company and its consolidated subsidiaries are included in selling, general and administrative expenses and manufacturing costs.

Research and development expenses for the years ended March 31, 2010, 2009 and 2008, amounted to ¥8,410 million (\$90,391 thousand), ¥9,458 million and ¥9,950 million, respectively.

11. Shareholders' Equity

The Corporation Law of Japan requires that an amount equivalent to 10% of cash dividends must be appropriated as a legal reserve or as additional paid-in capital upon the payment of said cash dividends until the aggregate of the legal reserve and additional paid-in capital equals 25% of common stock. Under the Corporation Law, the legal reserve and additional paid-in capital may be reversed without restriction on amount.

The Corporation Law also provides that common stock, legal reserve, additional paid-in capital, other capital surplus and retained earnings may be transferred among the accounts under certain conditions by resolution of the ordinary general meeting of shareholders.

The maximum amount that the Company can distribute as dividends is calculated based on the non-consolidated financial statements of the Company in accordance with the Corporation Law.

Dividends are not accrued in the consolidated financial statements for the corresponding period, but are recorded in the subsequent accounting period after shareholders' approval has been obtained.

As of March 31, 2010, retained earnings included year-end dividends of ¥1,528 million (\$16,421 thousand), or ¥4.00 (\$0.04) per share, which was approved at the ordinary general meeting of shareholders held on June 29, 2010.

12. Per Share Data

Dividends per share shown in the consolidated statements of income have been presented on an accrual basis and include, in each fiscal year, dividends approved or to be approved after the fiscal year-end but applicable to the fiscal year.

Basic net income per share is based on the weighted average number of shares of common stock outstanding during each fiscal year.

The number of shares used in calculating net income per share for the years ended March 31, 2010, 2009 and 2008, is as follows:

			Thousands of shares		
	2010	2009	2008		
Basic	387,296	394,853	399,013		
Diluted	_	_	_		

Note: There are no shares of common stock with dilutive effects.

13. Cash Flow Information

In the year ended March 31, 2009, newly acquired subsidiaries NMB Mechatronics Co., Ltd. and myonic Holding GmbH and their four consolidated subsidiaries (NMB Mechatronics (Thailand) Co., Ltd., myonic GmbH, myonic Limited and myonic s.r.o.), were included in the Company's consolidated accounts. The composition of assets and liabilities at time of acquisition of, and payments for purchase of shares in these new consolidated subsidiaries is as follows:

NMB Mechatronics Co., Ltd.

	Millions of yen
Current assets	¥ 3,025
Fixed assets	657
Goodwill	2,335
Current liabilities	(3,101)
Long-term liabilities	(20)
Acquisition cost	2,896
Cash and cash equivalents	991
Payments for purchase of shares in subsidiaries	¥ 1.905

myonic Holding GmbH

	Millions of yen
Current assets	¥ 2,022
Fixed assets	1,433
Goodwill	3,718
Current liabilities	(1,419)
Long-term liabilities	(69)
Acquisition cost	5,685
Cash and cash equivalents	325
Payments for purchase of shares in subsidiaries	¥ 5,360

14. Litigation

As of March 31, 2010, Thailand-based consolidated subsidiary NMB-Minebea Thai Ltd. received a revised assessment of income tax liability in the amount of 502 million baht from the Revenue Department of the Kingdom of Thailand. The Company has not accepted this revised assessment, believing it to be unjust and without legal grounds, and has petitioned the Revenue Department for redress.

On September 22, 2008, payment of this amount was made in subrogation using a surety bond from a bank with which the Company does business.

15. Contingent Liabilities

The Company and its consolidated subsidiaries had no material contingent liabilities as of March 31, 2010 or as of March 31, 2009.

16. Segment Information

The Company and its consolidated subsidiaries are engaged in two business segments: machined components, which includes bearings and bearing-related products, notably ball bearings, rod-end and spherical bearings and pivot assemblies, as well as other machined components, such as fasteners, and special machined components; and electronic devices and components, encompassing rotary components and other electronic devices and components, primarily PC keyboards and speakers.

The business segments of the Company and its consolidated subsidiaries as of March 31, 2010, 2009 and 2008, and for the years then ended are as follows:

There were no significant events subsequent to March 31, 2010.

Internal Control Report

1. Framework of Internal Control Over Financial Reporting

The management of Minebea Co., Ltd., is responsible for the design and operation of the internal control over financial reporting ("ICOFR") that is performed by Minebea Co., Ltd. as well as that performed by its consolidated subsidiaries and affiliated company accounted for under the equity method (collectively "Minebea Group"). Therefore, in accordance with the report "On the Setting of the Standards and Practice Standards for Management Assessments and Audit Concerning Internal Control Over Financial Reporting (Council Opinions)" (issued by the Business Accounting Council on February 15, 2007), management ensures that processes include basic internal control elements and are designed and operated appropriately in compliance with the basic framework of internal control, and also that the information contained in financial reports prepared by the Minebea Group is both appropriate and reliable.

However, internal control may not function effectively in cases where errors in judgment are made, there is carelessness or when a group of employees conspire to thwart said control. Furthermore, internal control may not apply in the event of unforeseeable changes to internal or external environments or for irregular transactions. For these reasons internal control of financial reporting is not absolutely effective in achieving its purposes and may not always be able to prevent or discover material misstatements contained in financial reports.

2. Assessment Scope, Timing and Procedures

Basis of Presenting Internal Control Report

The report on ICOFR of the consolidated financial statements of Minebea Co., Ltd. ("Internal Control Report") is prepared on the basis of generally accepted assessment standards of internal control over financial reporting in Japan ("Assessment Standards") and is compiled from the Internal Control Report prepared by Minebea Co., Ltd. as required by the Financial Instruments and Exchange Law of Japan ("Law").

The Assessment Standards require management to assess the ICOFR, which consists of the internal control over the consolidated/parent-only financial statements included in the Annual Securities Report filed under the Law and the internal control over disclosure information and others included in the Annual Securities Report that materially affects the reliability of the financial statements.

The scope of management's assessment of ICOFR in this annual report is different from the scope required by the Assessment Standards. Management assessment of ICOFR for this annual report covers the ICOFR with respect to the accompanying consolidated financial statements only. In addition, as explained in Note 1 on the basis of financial statement presentation, the accompanying consolidated financial statements are reclassified and additional information are provided from the consolidated financial statements prepared for the purpose of the Law. The process of making reclassifications and the addition of certain information is for the convenience of readers outside Japan. Management voluntarily includes the process in its assessment of ICOFR, even though it is outside the scope of the Assessment Standards.

Scope of Assessment

The reference date for the assessment of ICOFR was March 31, 2010, the end of the current fiscal year, and the assessment of the Minebea Group was carried out based on the Assessment Standards.

The basic assessment procedures consisted of providing relevant personnel with questionnaire sheets and checklists after analyzing and understanding the details of both internal control with a significant impact on all consolidated financial reporting ("entity-level internal control") and internal control over accounting and financial reporting process; collecting their replies; making further inquiries to relevant personnel based on the answers to the questionnaires and checklists; inspecting relevant documents and verifying related records; and then selecting internal control incorporated into process in order to be performed simultaneously with the implementation of said process ("process-level internal control") to be assessed based on those results.

In order to assess the effectiveness of the process-level internal control described above, the details of the processes subject to assessment were first examined for the purpose of proper understanding and analysis. Key controls that were considered to have significant influence to the reliability of financial reporting were then identified and the design and operation statuses of those key controls were assessed accordingly.

For the scope of evaluation for ICOFR, assessment was carried out on entity-level internal control and internal control over accounting and financial reporting process which have a significant effect on the Minebea Group's consolidated financial reporting and for which it was considered appropriate to carry out assessment of design and operation status from a entity-level standpoint. This assessment was carried out at all of our business locations.

For the scope of assessment for process-level internal control, 9 of our business locations were identified as significant business locations by using the accumulated data of each companies prior to consolidation elimination of the previous fiscal year and setting "total assets", "net assets", "sales" and "income before income taxes and minority interests" as selection indicators which showed that these 9 business locations made up approximately 70% or greater of the above accumulated data for the selection indicators. Then, processes which affect sales, accounts receivables and inventories, which are the accounts closely associated with Minebea Group's business objectives, were assessed for these 9 business locations.

In addition, by considering the impact to the consolidated financial reporting, other significant processes were also included in the assessment.

3.Results of Assessment

Management concluded that as of March 31, 2010, ICOFR of the Minebea Group was effective.

Independent Auditors' Report

To the Board of Directors of Minebea Co., Ltd.:

Financial Statement Audit

We have audited the accompanying consolidated balance sheets of Minebea Co., Ltd. and consolidated subsidiaries as of March 31, 2010 and 2009, and the related consolidated statements of income, changes in net assets and cash flows for the years then ended, expressed in Japanese yen. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to independently express an opinion on these consolidated financial statements based on our audits. The consolidated financial statements of Minebea Co., Ltd. and consolidated subsidiaries for the year ended March 31, 2008 was audited by other auditors whose report, dated June 27, 2008, expressed an unqualified opinion on those statements.

We conducted our audits in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Minebea Co., Ltd. and subsidiaries as of March 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in Japan.

The U.S. dollar amounts in the accompanying consolidated financial statements with respect to the year ended March 31, 2010 are presented solely for convenience. Our audit also included the translation of yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made on the basis described in Note 3 to the consolidated financial statements.

Internal Control Audit

We also have audited the accompanying report on internal control over financial reporting of the consolidated financial statements of Minebea Co., Ltd. as of March 31, 2010 ("Internal Control Report"). The design and operation of internal control over financial reporting and the preparation of the Internal Control Report are the responsibility of the Company's management. Our responsibility is to independently express an opinion on the Internal Control Report based on our audit. Internal control over financial reporting may not completely prevent or detect financial statement misstatements.

We conducted our internal control audit in accordance with auditing standards for internal control over financial reporting generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Internal Control Report is free of material misstatement. An internal control audit is performed on a test basis and includes evaluating the appropriateness of the scope, procedures and result of the assessment determined and presented by management and the overall Internal Control Report presentation. We believe that our internal control audit provides a reasonable basis for our opinion.

In our opinion, the Internal Control Report referred to above, in which Minebea Co., Ltd. states that internal control over financial reporting of the consolidated financial statements was effective as of March 31, 2010, presents fairly, in all material respects, the assessment of internal control over financial reporting in conformity with assessment standards for internal control over financial reporting generally accepted in Japan.

KPMG AZSA & Co.
