To Our Shareholders

The 70th Business Year Interim Business Report

April 1, 2015 September 30, 2015

Minebea Co., Ltd.

Business Summary

As the interim period of the 70th Business Year (April 1, 2015 - September 30, 2015) has ended, we would like to present our business summary.

Overview of the interim period

The Japanese economy continued to stagnate during the first half of the fiscal year (April 1, 2015 to September 30, 2015). Despite signs of improved consumer spending, both manufacturing and exports remained flat as corporations took a cautious approach to making capital investments.

At the same time, the U.S. economy continued to grow, mainly in the household sector. The robust non-manufacturing sector increased employment and income opportunities while the manufacturing industry lost steam. Fueled by local consumption, the European economy remained on an upward trajectory despite declining exports to non-EU countries.

In Asia, although China's GDP did not drop, a picture of economic uncertainty came into focus as manufacturing companies with excess production capacity and real estate developers put the brakes on investing. Despite the fact that ASEAN countries,

whose economies rely largely on China, did not see exports to China grow, they enjoyed moderate economic recoveries as exports to the U.S. and Europe as well as domestic demand picked up.

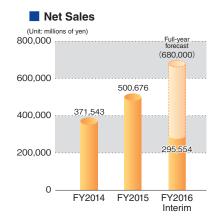

Working against this backdrop, the Minebea Group has been focusing on cutting costs, creating high-value-added products, developing new technologies, and honing its marketing approach in order to boost profitability further.

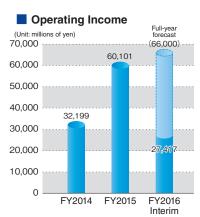

As a result, net sales were up 78,997 million yen (36.5%) year on year to total 295,554 million yen for a first half record high. Operating income also grew 2,656 million yen (10.7%) year on year to reach 27,417 million yen for another first half record high. Ordinary income was down 1,309 million yen (-5.3%) year on year at 23,326 million yen due to foreign exchange losses. Quarterly net income attributable to shareholders of the parent company totaled 17,758 million yen for a 59 million yen (-0.3%) year-on-year drop.

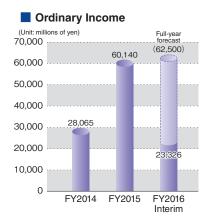

Outlook for the current fiscal year

The U.S. and European economies are likely to remain on an upward trajectory for the rest of this fiscal year, while robust

Financial Highlights (Consolidated)

corporate earnings, driven by the weak yen and low crude oil prices, are expected to prevent the Japanese economy from worsening. Yet looming risks, like China's slowing economic growth rate and a possible interest-rate hike in the U.S., still cast a shadow of uncertainty over the global economy.

Given this backdrop, we have decided to revise our consolidated forecast for the entire fiscal year based on our performance in the first half of the current fiscal year and immediate situation.

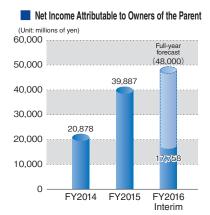

Net sales	680,000 million yen (135.8%)
Operating income	66,000 million yen (109.8%)
Ordinary income	62,500 million yen (103.9%)
Net income attributable to owners of the parent	48,000 million yen (120.3%)
	(%): Year-on-year change

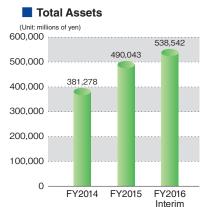

In light of the good performance for this fiscal year, the interim dividend is 10 yen per share. The Company plans to pay a 20 yen per share annual dividend (10 yen for interim dividend and 10 yen for fiscal year-end dividend).

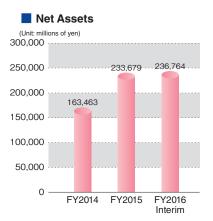

We look forward to your continuous support and guidance.

Yoshihisa Kainuma Representative Director December 2015

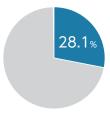

^{*} Following the application of "Accounting Standard for Business Combinations, etc.," "net income "has been renamed "net income attributable to owners of the parent" from the first quarter of the fiscal year ending March 31, 2016.

Machined Components Business

Net Sales 83,247 million yen

Up 13.0%

Net Sales Composition 28.1%

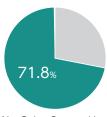

Products in our Machined components business segment include our mainstay, ball bearings, in addition to mechanical components, such as rod-end bearings used primarily in aircraft and hard disk drive (HDD) pivot assemblies, etc., as well as fasteners for automobiles and aircraft. Growing demand in all major markets fueled sales of ball bearings. Sales were particularly robust in the automobile market where demand for energy-efficient models equipped with safety devices soared. Sales of rod-end bearings used in aircraft were also upbeat. Pivot assembly sales dipped slightly in the face of the shrinking HDD market, but improved production efficiency drove operating income up.

As a result, net sales for the first six-month period were up 9,560 million yen (13.0%) year on year to total 83,247 million yen. Operating income was also up 845 million yen (4.4%) year on year, totaling out at 20,175 million ven.

Electronic Devices and Components Business

Net Sales 212,064 million yen Up 48.5%

Net Sales Composition 71.8%

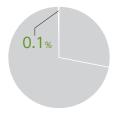

The core products of our Electronic devices and components business include electronic devices (LED backlights for LCDs and measuring components, etc.), HDD spindle motors, stepping motors, DC motors, fan motors, precision motors, and special devices. Surging demand buoyed sales of LED backlights for LCDs as market preferences shifted to high-end smartphones. Minebea's LED backlights have the technological edge when it comes to making thinner products and with more components command a higher price. Sales of measuring components also rose substantially due partly to the acquisition of the Sartorius Mechatronics T&H Group in the previous fiscal year. HDD spindle motor sales increased despite a continually shrinking HDD market while sales of stepping motors and other motors grew mainly in the office automation equipment and automobile markets.

All these factors combined brought net sales for the first six-month period up 69.272 million ven (48.5%) year on year to total 212,064 million yen. Operating income was also up 1,915 million yen (18.4%) year on year, reaching 12,349 million yen.

Other Business

Net Sales 242 million yen Up 212.5%

Net Sales Composition 0.1%

First half net sales in our Other business segment, which includes machines produced in-house, rose 165 million yen (212.5%) year on year to total 242 million yen. Operating income decreased by 94 million yen (-79.6%) year on year to total 24 million yen.

- Notes: 1. This fiscal year, the Company has changed its organizational structure; for example, the Electronics Devices & Components Manufacturing Headquarters is included in In-House Division. With this change, segments are also changed.
 - 2. In operating income for the current interim period, in addition to the figures noted above, 5,130 million yen in corporate expenses, etc., not belonging to any particular segment has been included as adjustments. Adjustments for the corresponding period of last fiscal year amounted to 5,121 million yen.

Bearing with 1.5 mm in Outer Diameter Recognized as the Smallest Ball Bearing by the Guinness World Records

A ball bearing having 1.5 mm in outer diameter, manufactured by the Company, was recognized as the smallest commercially available steel ball bearing by the Guinness World Records on August 28, 2015. (Outer diameter: 1.5 mm, inner diameter: 0.65 mm, width: 0.65 mm, speed: 5,000 RPM)

The recognized ball bearings are used in the Tourbillon mechanism (mechanism that compensates for errors caused by tilting of the watch) installed in the highest-grade mechanical watches in Japan. Our miniature ball bearings have been adopted for the first time in the Tourbillion mechanism, the design/ development and manufacture of which were considered the most difficult, installed in the mechanical watches, the delicate axels of which have been traditionally supported by jewelries such as rubies. Such an application was featured as the epoch-making event among the independent watch-makers in Switzerland. The Company expects to attract the interest of others to the new market for the application of ultra-small ball bearings, which will lead us to new orders and wider usages and applications on an on-going basis.

Selection of Plan by MOEJ as Financing Program for JCM Model Project

~ Project to Introduce High-efficiency LED Street Lighting in Cambodia Utilizing Wireless Technologies ~

The plan proposed by the Company was selected, in October 2015, as one of the financing programs for the model projects under the "Joint Crediting Mechanism ("JCM") entrusted by the Ministry of the Environment of Japan ("MOEJ"), in which the Company intends to introduce high-efficiency LED street lighting in Cambodia through the application of wireless technologies.

The Company has been conducting the research and development of lighting equipment that is capable of adjusting the light distribution of lighting by applying the technologies cultivated in the manufacture of ultra-thin lenses used for LED backlights. Moreover, since combining the wireless technologies of Paradox Engineering SA of Switzerland, the Company's subsidiary, the Company has engaged in the design and development of high-efficiency LED street lighting. Such street lighting is equipped with the capabilities to adjust light control with perfect freedom through wireless networking, and monitor the operating time and power consumption, thereby significantly reducing the amount of energy consumption and the emission of greenhouse effect gasses.

Street light and Paradox Engineering SA's wireless system installed at our plant in Cambodia

Start of Mass Production and Sales of New LED Lighting "SALIOT"

The Company has applied technologies for light guiding panels and plastic injection molding that have been cultivated through the production of LED backlights to develop LED Lighting (Smart Adjustable Light for IoT (SALIOT)) capable of automatically adjusting a light distribution angle. Mass production and sales started in Japan and overseas in July 2015.

"SALIOT" is a new product, which not only can adjust the direction of light and light distribution angles ranging from 10° to 30° through controlling the distance between the light emitting diode and the lens by motor, but also can manage and control a light distribution angle and brightness, both horizontally and vertically with ease by smartphone or tablet through the development and implementation of software applying Bluetooth Mesh wireless technologies on a proprietary basis.

Up to this point, the adjustment of large-sized illumination installed in the high ceiling—such as is required at the commercial complex, show rooms, museums of various kinds, art museums, etc.—has been performed manually

New LED Lighting "SALIOT"

with a stepladder or an adjusting rod, which is dangerous and troublesome at times. "SALIOT" is capable of controlling the various directions of light and light distribution angles for up to 100 units of lighting devices using one controller, thereby providing appropriate solutions to a wide array of customers including facility owners, contractors, designers, etc.

Distribution of Number of Shareholders by Number of Shares Held

[Payment of Interim Stock Dividends for the 70th Business Term]

The Interim stock dividends for the 70th Business Year will be paid by the enclosed *Interim Stock Dividend Warrant for the 70th Business Year*. Please take this Warrant to any office or post office of Japan Post Bank and Japan Post Network (banking agency) within the specified payment period (from December 4, 2015 to January 12, 2016) to receive your dividends.

We have enclosed forms of *Statement of Interim Dividends* and *Where to Transfer Dividends* for those who have designated a transfer account(s), and forms of *Statement of Interim Dividends* and *How to Receive Dividends* for those who have chosen the method of share number pro-rata distribution in plural securities company accounts for your confirmation.

(With respect to where to transfer dividends in the case that you have chosen the method of share number pro-rata distribution in plural securities company accounts, please contact the securities company with which you deal.)

(Special Accounts)

What is a special account?

In line with share certificate dematerialization, all our shares are electronically registered at Japan Securities Depository Center, Inc. (JASDEC). As a general rule, such an account is managed through a shareholder's account at a securities company. Shares of such shareholders that have not notified us of their accounts at securities companies are managed at special accounts we opened at Sumitomo Mitsui Trust Bank, Limited in order to protect the shareholders' rights.

Shares registered in our special accounts cannot be traded except for selling or buying shares less than one unit (1,000 shares). To sell or buy shares in a special account, shareholders are requested to open an account with a securities company and transfer such shares from our special account to their account. For details of the procedures, please contact the Stock Transfer Agency Business Planning Department of Sumitomo Mitsui Trust Bank, Limited.

[Shareholders' Inquiries and Notifications Concerning Matters Such as Change of Address]

Please direct inquiries or notifications concerning procedures related to shares (such as change of registered address, change of the method or place to receive dividends, and request to sell or buy shares less than one unit [for holders of shares less than one unit]) to the following, depending on your account type.

Shareholders whose shares are recorded in the account at a securities company	Please contact the securities company.
Shareholders whose shares are recorded in the special account	Please contact the Stock Transfer Agency Business Planning Department of Sumitomo Mitsui Trust Bank, Limited
