Forward-looking statements

This document includes “forward-looking statements” that reflect the plans and expectations of MinebeaMitsumi and U-Shin in relation to, and the benefits resulting from, their business integration described above. To the extent that statements in this document do not relate to historical or current facts, they constitute forward-looking statements. These forward-looking statements are based on the current assumptions and beliefs of the companies in light of the information currently available to them, and involve known and unknown risks, uncertainties and other factors. Such risks, uncertainties and other factors may cause the actual results, performance, achievements or financial position of one or both of the companies (or the group after the integration) to be materially different from any future results, performance, achievements or financial position expressed or implied by these forward-looking statements.

The companies undertake no obligation to publicly update any forward-looking statements after the date of this document. Investors are advised to consult any further disclosures by the companies (or the group after the integration) in their subsequent filings in Japan and filings with the U.S. Securities and Exchange Commission.

The risks, uncertainties and other factors referred to above include, but are not limited to:

1. economic and business conditions in and outside Japan;
2. changes in demand for PCs and peripherals, information and communication equipment, automobiles, consumer electronics and other devices and equipment, which are the main markets of the companies’ products, and in raw material prices, as well as exchange rate fluctuations;
3. changes in interest rates on loans, bonds and other indebtedness of the companies, as well as changes in financial markets;
4. changes in the value of assets (including pension assets) such as securities and investment securities;
5. changes in laws and regulations (including environmental regulations) relating to the companies’ business activities;
6. increases in tariffs, imposition of import controls and other developments in the companies’ main overseas markets;
7. interruptions in or restrictions on business activities due to natural disasters, accidents and other causes;
8. the companies’ being unable to reach an agreement satisfactory to both of them with respect to the details of the business integration or otherwise being unable to complete the business integration;
9. difficulty of realizing synergies or added value from the business integration by the group after the integration.
