* Explanation for appropriate use of financial forecasts and other special remarks

The above-mentioned forecasts are based on the information available as of the date when this information is disclosed, as well as on the assumptions as of the disclosing date of this information related with unpredictable parameters that are probable to affect our future business performances in the end. In other words, our actual performances are likely to differ greatly from these estimates depending on various factors that will take shape from now on. As for the assumptions used for these forecasts and other related items, please refer to page 5 of the documents attached hereunder.

1. Operating Performance

(1) Analysis of operating performance

1. Overview of the year

During the current consolidated fiscal year, the Japanese economy continued moderate expansion due mainly to corporate earnings being at a high level, supported by the rise of exports and capital investment, although there were signs of a slowdown, such as the ongoing surge of crude oil and raw materials prices, and the drop in housing and construction investments in the second half of the year. In the U. S. economy, owing principally to the dislocation in the financial and capital markets, as well as the deepening adjustment in the housing market stemming from the sub-prime housing loan problem in the second half of the year, uncertainties started to pick up regarding the future course of the economy. Additionally, owing principally to the fact that strong capital investment and personal consumption began to slow down, recession risks were rising. The European economy continued moderate growth led by domestic demand, although there were signs of winding down. In China, the economy continued to grow at a high rate, due principally to the rise of exports and investments in fixed assets, and in other Asian countries also, the economies generally advanced firmly.

Under these management circumstances, we strove to implement sweeping cost reduction measures, develop new technologies and high value-added products, and promote sales expansion activities, in order to further increase earnings.

As a result, net sales increased 3,409 million yen (1.0%) year on year, to 334,431 million yen, and operating income also increased 4,497 million yen (17.1%) year on year, to 30,762 million yen. Ordinary income largely rose 5,848 million yen (26.8%) year on year, to 27,691 million yen, and net income also significantly increased 3,440 million yen (26.8%) year on year, to 16,303 million yen. Net sales and net income both stood at a record high.

(a) Performance by business segment is as follows:

Machined components business

Our products in this business segment include ball bearings, which are our mainstay product; mechanical components such as rod-end bearings primarily for use in aircraft and pivot assemblies for use in hard disk drives (HDDs); screws for automobiles and aircraft; and defense-related devices and equipment. Sales of ball bearings to makers of automobiles and information & telecommunications equipment increased largely year on year owing to our vigorous sales expansion efforts. Sales of rod-end bearings rose to the aerospace industry, mainly in the U.S. and Europe. Also, sales of pivot assemblies grew. As a result, net sales rose 6,372 million yen (4.6%) year on year, to 144,034 million yen. Operating income also increased 1,555 million yen (5.9%) year on year, to 27,750 million yen, a result of pursuing basic technologies, product technologies and manufacturing techniques, as well as implementing increased production and continuous cost reduction measures.

Electronic devices and components business

Our core products in this business segment include information motors (fan motors, stepping motors, vibration motors and DC brush motors); HDD spindle motors; PC keyboards; speakers; LCD back lights; inverter and measuring instruments. Sales of motors including information motors rose strongly to manufacturers of mobile phones, office automation, personal computers, and peripheral equipment. Sales of measuring components also increased significantly due to the cultivation of new markets. But in PC keyboards and speakers, which are both being focused on high value-added products, sales decreased largely. As a result, net sales fell 2,963 million yen (-1.5%) year on year, to 190,396 million yen. Operating income substantially improved 2,943 million yen year on year, to 3,012 million yen on improved earnings in information motors and PC keyboards.

(b) Performance by geographical segment is as follows:

Japan

In this region, net sales fell 7,886 million yen (-9.5%) year on year, to 75,378 million yen due to decreased sales of PC keyboards and other products. In addition, operating income also decreased 673 million yen (-6.9%) year on year, to 9,096 million yen.

Asia (excluding Japan)

This region, including Greater China region which continues high growth, is an important manufacturing base for many makers of Japan, Europe, America and other countries. Sales were firm mainly in the Greater China region, led by expanded demand from the information & telecommunications equipment industry and steady demand from the household electrical appliance industry. As a result, net sales increased 8,144 million yen (5.0%) year on year, to 170,474 million yen, and operating income also largely expanded 4,274 million yen (37.8%), to 15,573 million yen.

North America

In North America, both orders and sales of U.S.-made ball bearings and rod-end bearings for use mainly in the aircraft-related industries were strong. But due to weak sales of PC keyboards, which are being shifted to high-valued added items, net sales fell 2,525 million yen (-4.5%) year on year, to 53,584 million yen, while operating income largely rose 745 million yen (20.0%), to 4,475 million yen.

Europe

Sales of ball bearings, rod-end bearings and other products were firm as moderate economic growth was seen in this region. As a result, net sales increased 5,676 million yen (19.4%) year on year, to 34,993 million yen, and operating income increased 151 million yen (10.3%) year on year, to 1,616 million yen.

2. Outlook for the next fiscal year

In the Japanese economy, amid the world economy tending to wind down, we expect that the economy will be slow in the first half of the fiscal year, owing to weak corporate earnings and personal consumption stemming from the current rise of the yen, along with decreased exports as well as the ongoing surge of crude oil and raw materials prices. However, in the second half of the year, the economy is expected to embark upon a moderate recovery trend with improved exports in line with recovery of the U.S. economy. In Asia, we expect that the Chinese economy will continue to grow, while in the U.S., the economy might fall into recession due mainly to the protracted adjustments in corporate production, inventory and employment, as well as the slowdown of personal consumption stemming from the degradation of the financial environment and the ongoing surge of crude oil and commodity prices. However, triggered mainly by the tax cuts and the substantial reductions of interest rates, it is expected that the economy will gradually be heading toward recovery in the second half of the year.

Under these circumstances, we expect that results will be largely fat, although net sales a significant portion of which is outside of Japan will be reduced by the rise of the yen. We also expect that further cost reductions, development of high-value added products and cultivation of new markets will increase operating income year on year.

(a) Outlook by business segment for the full year is as follows:

Machined components business

We will continue to aggressively expand sales of mainstay ball bearings to the automobile and information & telecommunications equipment industries, demand from which is firm. By achieving economies of scale in manufacturing from this sales expansion and further reducing costs, we aim to improve business results further. In addition, the aircraft market for rod-end bearings are strong, particularly in the U.S. and Europe. We can expect benefits from this strong aircraft market. In pivot assemblies, we expect that results will be enhanced with strong demand.

Electronic devices and components business

In the information motor business, we will strive to further enhance results by continuing to improve production efficiencies and to make product mix reviews. In the spindle motor business, we will strive to improve results mainly by making cost reduction efforts and boosting sales of 2.5" motors. Also, in the PC keyboard business, we can expect stable results by focusing mainly on high-quality, high-priced models. Sales of LCD backlight assemblies, inverters, measuring components and other products are expected to advance favorably.

(b) Outlook by geographical segment for the full year is as follows:

Japan

We expect that sales will continue to be in a harsh operating environment, as many of our customers are shifting production from their plants in Japan to those in other Asian countries, including China. However, we will aim for increased sales by developing new markets and introducing new products.

Asia (excluding Japan)

This region offers the largest market for our products. Taking full advantage of having our key manufacturing bases right in this largest market area, we strongly aim to improve performance. In spindle motors, information motors and PC keyboards, we can expect benefits from implementation of manufacturing cost reduction measures.

North America

In U.S. manufactured rod-end bearings and other principal products, we continue to receive strong orders from aerospace and other industries. We also expect that import products such as ball bearings and motors will continue to post firm sales, despite a fall in sales of PC keyboards due to a shift to high-priced products.

Europe

The European economy continues to grow moderately despite fears of a slowdown. We expect that sales will move as we witnessed for the current consolidated fiscal year.

(2) Analysis of financial position

Condition of the year

The Minebea Group has adopted strengthening its financial position as a principal business policy, and is taking various measures, such as squeezing total assets, controlling capital investment and reducing liabilities

Total assets at the end of the current consolidated fiscal year fell 34,239 million yen year on year, to 320,544 million yen. The major reason for this fall is the decline in the assets of our overseas affiliates converted to yen.

Net assets were 131,730 million yen, and the capital ratio was improved by 0.6 point year on year, to 40.7%.

(Condition of cash flows)

The balance of cash and cash equivalents in the current consolidated fiscal year totaled 23,281 million yen, up 1,550 million yen year on year.

Cash flows from various business activities during the current consolidated fiscal year and relevant factors are as follows:

Operating activities: Owing primarily to increased income before income taxes and decreased inventories, net cash flow from operating activities increased 8,991 million yen year on year, to 46,893 million yen.

Investing activities: Due mainly to increased payments of expenditures for purchase of property, plant and equipment, net cash outflow from investing activities rose 8,281 million yen year on year, to 23,461 million yen.

Financing activities: Owing primarily to the repayment of long-term debts and the payment of dividends, net cash flow from financing activities decreased 5,079 million yen year on year, to 20,604 million yen.

(3) Basic policy for profit sharing and dividends for the current and the next fiscal years

Considering its management environment from a comprehensive standpoint and putting improved equity capital efficiency and better profit sharing to shareholders first, the Company will aim for profit distribution to shareholders at levels reflecting operating results better.

Under this policy, for the current fiscal year, we plan to propose paying a 10 yen per share year-end dividend, the same as the previous year, at our 62nd ordinary general meeting of shareholders scheduled to be held in June this year.

Also, as part of its profit distribution policy, the Company has been paying dividends collectively at year end. However, with the objective of increasing the opportunities to distribute profits to shareholders, we plan to pay interim dividends from fiscal 2008 (the year ending March 31, 2009). Regarding the dividends for the next fiscal year, we plan to pay an interim dividend of 5 yen per share and a year-end dividend of 5 yen per share (10 yen for the year).

(4) Risk Management

As of the end of the current consolidated fiscal year, the company recognizes that the Minebea Group has the following risks and uncertainties that have the potential to affect its group operating results and/or financial position:

1. Market risk

Principal markets for Minebea products, including those for PCs and peripheral equipment, information and telecommunications equipment and household electrical appliances, are intensely competitive and subject to significant fluctuations in demand. Our operating results and financial position are vulnerable to these fluctuations.

2. Foreign exchange risk

A significant portion of our consolidated net sales and production are outside of Japan. Our business is thus vulnerable to risks associated with fluctuations in foreign currency exchange rates. We have entered into various currency exchange contracts and other derivatives transactions to hedge these risks, but fluctuations in foreign currency exchange rates may affect our operating results and/or financial position over the long term.

3. R&D risk

While we focus on R&D to introduce a constant stream of new, high-quality products, we are subject to the risk that significant R&D expenditures may not be rewarded with successes, as there are no guarantees that R&D efforts will come to fruition.

4. Legal risk

The Legal Department is responsible for managing risk related to lawsuits and other legal actions brought against Minebea Group operations in Japan and/or overseas. We are subject to the risk that lawsuits or other actions with the potential to affect our operating results and/or financial position may be brought against us in the future.

5. Risk related to price negotiations

We continue to face intense competition from lower-priced products made overseas. We are subject to the risk that we will be unable to maintain or increase our share should market needs shift to low-quality, low-priced products.

6. Risk related to raw materials and logistics costs

We purchase a variety of materials from external suppliers and strive to ensure optimal purchase inventory volumes for such materials and access to stable supplies of materials with stable prices. However, we are subject to the risk that rising prices for such materials may affect our operating results and/or financial position in the future.

7. Latent risk related to operations overseas

The Minebea Group's manufacturing activities are conducted primarily in Thailand, China, and Singapore. While considerable time has passed since we established operations in these countries, our operations overseas are subject to the following risks, any of which may have a negative impact on our operating results and/or financial position:

- (a) Unexpected changes to laws or regulations.
- (b) Difficulty in attracting and securing appropriate human resources.
- (c) Acts of terrorism or war, or other acts that may cause social disruption.

2. Condition of group of enterprises

Minebea group consists of Minebea Co., Ltd. (the Company) and 42 related companies (41 consolidated subsidiaries and 1 affiliated company). Minebea group produces and sells bearings, machinery components, special machinery components, electronic devices.

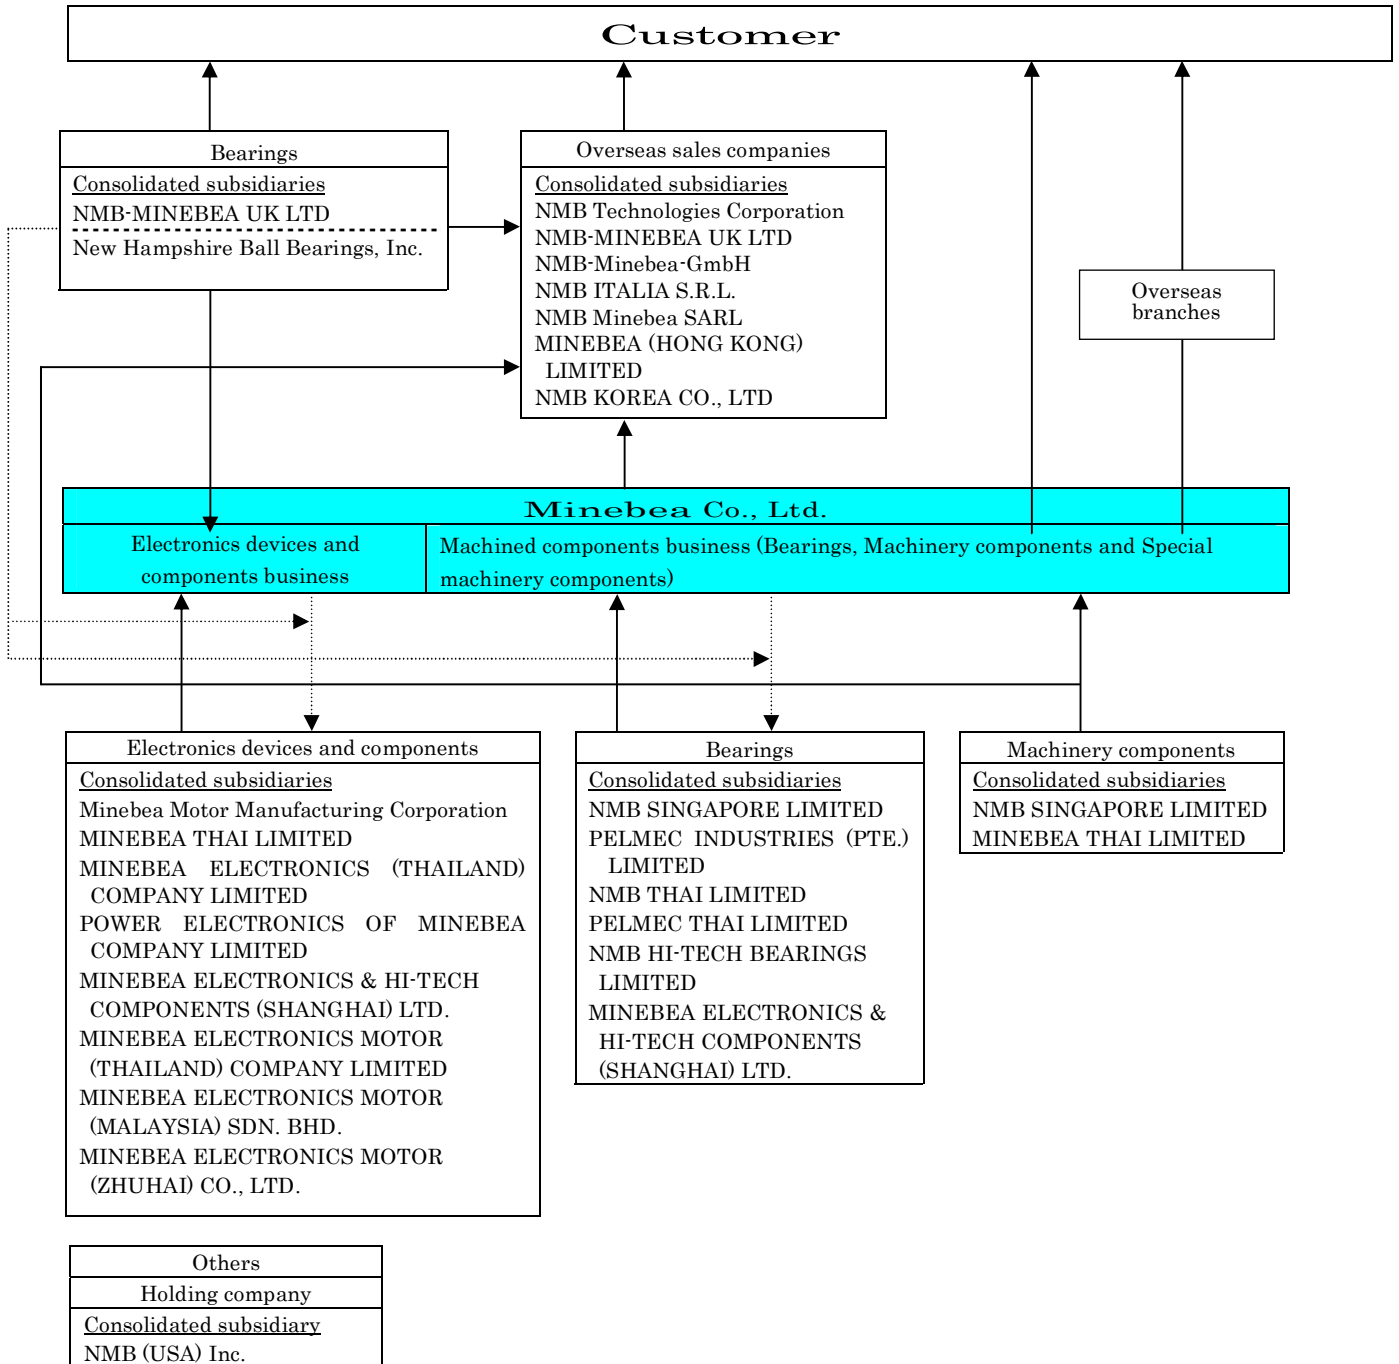

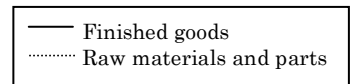

The Company and domestic consolidated subsidiaries, consolidated subsidiaries in U.S.A., Europe and Asia are in charge of production. The Company markets its products directly to Japanese customers. In overseas markets, the Company markets its products through its subsidiaries and branches in the United States, Europe and Asia.

The relationship between each operation and business segments, and main manufacturing and sales companies are as follows.

Operation route is as follows.

3. Management Policy

(1) Basic Management Policy

The Minebea Group has adopted the following five principles as its basic policy for management.

- (a) Ensure that Minebea is a company for which we feel proud to work.
- (b) Reinforce the confidence our customers have.
- (c) Respond to our shareholders' expectations.
- (d) Ensure a welcome for Minebea in local communities.
- (e) Contribute to a global society.

Under this basic management policy, we have actively addressed the development of high value-added products and the sophistication of product quality. In addition we have focused company resources on areas where we can display ultra-precision machining technologies and mass production technologies that are both the source of our competitiveness. At the same time, we have strengthened our operations based on financial improvements, and have striven to practice a transparent management form that is easier to understand within and across the company.

Furthermore, as a key theme in the development of business in various parts of the world, we have continued our commitment to environmental protection activities.

(2) Management Index

Our consolidated forecasts for fiscal year ending March 2009 are as follows:

(Amount: millions of yen)

| | Fiscal year ending March 2009 |
|--------------------|-------------------------------|
| Net sales | 330,000 (98.7%) |
| Operating income | 32,000 (104.0%) |
| Ordinary income | 29,500 (106.5%) |
| Net income | 17,000 (104.3%) |
| Capital investment | 29,000 (116.5%) |

(%): Year-on-year rate of change

(3) Future Management Strategies and Tasks

In accordance with the basic management policies as mentioned earlier, we aim to improve profitability and enhance corporate value based on a "vertically integrated manufacturing system," "large-scale volume production system," and "well-developed R&D system," which have been established worldwide, in order to ensure our place as "a company that leads the competition through manufacturing and technological excellence."

Our innovations to be accomplished to achieve this goal and sustainable growth are "development of new products," "cultivation of new markets" and "innovation of production technologies":

- (a) In ball bearings, create and expand new demands by strengthening production capacity of miniature ball bearings that have much potential for growth and developing new products (micro miniature ball bearings and other key products);
- (b) To further reinforce aircraft parts for which demand is expected to increase, build our operations in the area of aircraft mechanical parts using advanced machining technologies, in addition to existing rod-end and spherical bearings;
- (c) Build our operations in the area of fan motors and other precision small motors into a second pillar of our operations after bearings and bearing-related products; and
- (d) Increase the ratio of high-value-added products in all product categories and diversify offerings to serve a broader market.

Number of affiliated companies.....1 company

of which, equity method is applied to 1 company including Shonan Seiki Co., Ltd.

2. Scope of consolidation and application of equity method

Changes in consolidated subsidiaries

Anew: None

Exclusion: Liquidation (1 company) MINEBEA ELECTRONICS (U.K.) LIMITED

3. Balance sheet dates of consolidated subsidiaries and equity-method companies

Consolidated subsidiaries which were accounted for by the equity method whose balance sheets are different from the consolidated balance sheet date, the Company uses their financial statements based upon the provisional settlement of accounts they balanced as of the consolidated balance sheet date in the preparation of the financial statements of the current consolidated term.

Company which was accounted for by the equity method whose balance sheets are different from the consolidated balance sheet date, the Company uses their financial statements based upon the provisional settlement of accounts they balanced as of the consolidated balance sheet date in the preparation of the financial statements of the current consolidated term.

4. Accounting policies

(a) Valuation basis and method of significant assets

1. Securities

Other marketable securities

Securities with market value

The Company adopted the market value method based on market prices and other conditions at the end of the term. Also, the Company accounted for all valuation differences based on the direct net asset method and the sales costs are calculated by the moving average method.

The Company's consolidated overseas subsidiaries also used primarily the same accounting method.

Securities without market value

Non listed securities are stated at cost determined by the moving average method.

2. Derivative

Market value method

The Company's consolidated overseas subsidiaries also used primarily the same accounting method.

3. Inventories

The Company and consolidated domestic subsidiaries state primarily at the moving average cost.

Consolidated overseas subsidiaries state at the lower of first-in, first-out cost or market, or at the lower of average cost or market.

(b) Method of significant Depreciation

1. Tangible fixed assets

The Company and consolidated domestic subsidiaries adopt the declining balance method.

Their major useful lives are as follows:

Buildings and structures 2 to 50 years

Machinery and transportation equipment 2 to 15 years

Tools, furniture and fixtures 2 to 20 years

They also collectively show equal charges for small depreciable assets (whose acquisition values are not less than 100,000 yen and less than 200,000 yen) over the 3 years each consolidated fiscal year.

Consolidated overseas subsidiaries mainly adopt the straight-line method.

(Change of depreciation method)

From the current consolidated accounting period, regarding the fixed assets purchased on or after April 1, 2007, the Company posts depreciation and amortization expenses pursuant to the depreciation method provided in the revised Corporation Tax Law.

This respectively decreases 201 million yen in operating income, ordinary income and income before income taxes and minority interests.

(Additional information)

Of tangible fixed assets acquired before March 31, 2007, regarding those whose depreciation up to their depreciable amounts was completed, the Company depreciates their remaining book values equally over 5 years from the current consolidated accounting period.

This respectively decreases 231 million yen in operating income, ordinary income and income before income taxes and minority interests.

2. Intangible fixed assets

The Company and consolidated domestic subsidiaries mainly adopt the straight-line method. However, depreciation of software (for internal use) is computed on the straight-line method based on our expected useful period (5 years).

Consolidated overseas subsidiaries mainly adopt the straight-line method.

(c) Valuation basis of significant allowances

1. Allowance for doubtful receivables

The Company and consolidated domestic subsidiaries make the record in the amount required for the estimated uncollectible receivables based on actual losses of trade receivables and on collectability of specific receivables with loss possibilities.

Consolidated overseas subsidiaries make the record in the amount required for the estimated uncollectible receivables based on the collectability of each receivable for possible losses on the receivables.

2. Accrued bonuses

The Company and consolidated domestic subsidiaries make preparations for the payment of bonuses to employees, accrued bonuses are shown based on the anticipated amounts of payment in the current term.

Consolidated overseas subsidiaries make the record on accrual basis.

3. Allowance for bonuses to directors and corporate auditors

To provide for payment of bonuses to directors and corporate auditors, the Company records an amount, based upon the estimated amount of payment for the current consolidated accounting period.

4. Allowance for retirement benefits

Regarding the Company and its consolidated Japanese subsidiaries, to provide for payment of employee retirement benefits, the Company reported allowance for retirement benefits or prepaid pension costs, based on estimated retirement benefit debts and pension assets at the end of the current consolidated accounting period.

At the end of the current consolidated accounting period, prepaid pension costs is included in others of investments and other assets.

Over the 5 years within the average remaining length of employees' service, the Company will charge differences in mathematical calculation to expenses from the next term, in accordance with the straight-line method.

Regarding the Company's consolidated overseas subsidiaries, each subsidiary stated retirement benefits or prepaid pension costs estimated to accrue at the end of the current consolidated accounting period to provide for employee retirement benefits.

At the end of the current consolidated accounting period, prepaid pension costs is included in others of investments and other assets.

Unrecognized prior service cost is amortized using the straight-line method over a period of 10 years as cost. Actuarial gains and losses are amortized using the straight-line method over a period of 10 years, from the period subsequent to the period in which they are incurred.

5. Allowance for retirement benefits to executive officers

We posted retirement allowances to be required for payment at the end of the current consolidated fiscal year in accordance with regulations.

6. Allowance for business restructuring losses

Based upon the decision of the structural reform plan for its PC keyboard business and other key businesses, the Company has reported the reasonably estimated amounts of expenses that it is expected to incur in the future.

The Company's consolidated overseas subsidiaries also used primarily the same accounting method.

(d) Translation of foreign currency assets and liabilities in financial statements of the Company and consolidated subsidiaries

The Company and its consolidated domestic subsidiaries translate monetary receivables and payables in foreign currency into yen at the spot exchange rates on the balance sheets date. The resulting exchange differences are accounted for as an exchange gain or loss.

Assets and liabilities are translated into yen at the spot exchange rates at the consolidation date, while revenues and expenses are translated into yen at the average rates for the year. Exchange differences are included in foreign currency translation adjustments and minority interests in net assets.

(e) Accounting method of significant lease transactions

In accordance with the accounting method in reference to ordinary rental transactions, the Company and its consolidated domestic subsidiaries accounted for finance lease transactions, excluding those in which the ownership of leased property will be transferred to the lessees.

The Company's consolidated overseas subsidiaries also used primarily the same accounting method.

(f) Accounting method of significant hedge transactions

1. Method of hedge accounting

The Company adopts the allocation method to account for the forward exchange contracts for foreign currency-denominated receivables and payables, and the deferred hedge method to account for the forward exchange contracts for foreign currency-denominated anticipated transactions. The Company also adopts the special method to account for the interest rate swaps, which meet the requirements of special accounting.

2. Hedging vehicles and hedged items

(Hedging vehicles)

Forward exchange contracts

Interest rate swaps

(Hedged items)

Monetary receivables and payables in foreign currency

Anticipated transactions in foreign currencies

Interest rates on borrowings

3. Hedge policy

Under the guidance of its Finance Department, the Company makes forward exchange contracts to hedge risks in foreign exchange fluctuations arising from export and import transactions, and from lending in foreign currency. The Company also makes interest rate swaps to hedge fluctuation risks in interest rates on borrowings.

4. Method of assessing hedge effectiveness

Regarding forward exchange contracts, in principle, the Company allocates them to monetary receivable and payable with same maturities and same amounts in foreign currency at closing of forward exchange contracts in accordance with the risk management policy. This completely ensures correlations reflecting subsequent exchange rate fluctuations. The Company assesses hedge effectiveness based upon such correlations.

Also, regarding interest rate swaps, the Company assesses hedge effectiveness based upon the fulfillment of the accounting requirements for special treatment.

(Notes) The Company's consolidated overseas subsidiaries also used primarily the same accounting method listed above in 1-4.

(g) Accounting method of consumption tax and other

Consumption tax and other related taxes are excluded from revenue and purchases of the Company.

(6) Evaluation of consolidated subsidiaries' assets and liabilities

The Company adopts the step fair value method as evaluation method of consolidated subsidiaries' assets and liabilities.

(7) Amortization of goodwill and negative goodwill

The goodwill is equally amortized for from 5 to 40 years considering the accounting customs of the consolidated companies' countries.

(8) Range of cash in cash flow statements

Cash and cash equivalents consist of cash on hand, demand deposit and short-term investments which expire within 3 months from acquisition date, have high liquidity and are easily turned into cash.

(9) Change of presentation

(Consolidated Statements of Cash Flows)

The loss on liquidation of affiliates in cash flows from operating activities was included in others the previous consolidated fiscal year. But because its monetary importance is increasing, it is separately shown.

The previous consolidated fiscal year's loss on liquidation of affiliates included in others was 56 million yen.

(Relating to Lease Transactions)

Millions of yen

| (1) Equivalent of acquisition value of leased items, equivalent of total amount of depreciation, accumulated impairment loss equivalent, and equivalent of year-end closing balance: | <u>Year ended March 31, 2007</u> | | | <u>Year ended March 31, 2008</u> | | |
|--|----------------------------------|--|--------------------------------|----------------------------------|--|--------------------------------|
| | Equivalent of acquisition value | Equivalent of total amount of depreciation | Equivalent of year-end balance | Equivalent of acquisition value | Equivalent of total amount of depreciation | Equivalent of year-end balance |
| Machinery and transportation equipment | 1,439 | 742 | 697 | 1,595 | 618 | 976 |
| Tools, furniture and fixtures | 2,387 | 1,313 | 1,074 | 2,224 | 1,200 | 1,024 |
| Software | 33 | 12 | 21 | 21 | 10 | 11 |
| Total | <u>3,860</u> | <u>2,067</u> | <u>1,792</u> | <u>3,841</u> | <u>1,829</u> | <u>2,012</u> |

Because of a low ratio of the year-end closing balance of unexpired lease expenses to a total amount of the year-end closing balance of tangible fixed assets plus the year-end closing balance of unexpired lease expense, equivalent of acquisition value in the term period in the current fiscal year has been calculated based on "Interest payment inclusive method".

(2) Equivalent of year-end closing balance of unexpired lease expenses:

| | | |
|---------------|------------|--------------|
| within 1-year | 895 | 889 |
| over 1-year | <u>896</u> | <u>1,122</u> |
| Total | 1,792 | 2,012 |

Because of a low ratio of the year-end closing balance of unexpired lease expenses to a total amount of the year-end closing balance of tangible fixed assets plus the year-end closing balance of unexpired lease expense, equivalent of year-end closing balance of unexpired lease expenses in the term period in the current fiscal year has been calculated based on "Interest payment inclusive method".

(3) The amount of lease expenses, mobilization of lease asset impairment losses, equivalent of depreciation expenses and impairment loss:

| | | |
|-------------------------------------|-------|-------|
| Amount of lease expenses | 1,080 | 1,144 |
| Equivalent of depreciation expenses | 1,080 | 1,144 |

(4) Method of computing equivalent of depreciation expenses:

Computation is based on straight-line method with the lease term as a useful life and the residual value to be set at zero.

(Impairment loss) There were no impairment losses allocated to lease assets.

(d) Depreciation

Tangible fixed assets:

Depreciation of tangible fixed assets is made on the declining balance method based on estimated useful lives of the assets.

Their major useful lives are as follows:

Buildings and structures 2 to 50 years

Machinery and equipment 2 to 15 years

Tools, furniture and fixtures 2 to 20 years

The depreciation method of depreciation assets whose acquisition values are not less than 100,000 yen and less than 200,000 yen has been changed to a method by which those assets are equally depreciated in lump sum for 3 years.

(Change of depreciation method)

From the current term, regarding the fixed assets purchased on or after April 1, 2007, the Company posts depreciation and amortization expenses pursuant to the depreciation method provided in the revised Corporation Tax Law.

This respectively decreases 173 million yen in operating income, ordinary income and income before income taxes.

(Additional information)

Of tangible fixed assets acquired before March 31, 2007, regarding those whose depreciation up to their depreciable amounts was completed, the Company depreciates their remaining book values equally over five years from the current accounting period.

This respectively decreases 221 million yen in operating income, ordinary income and income before income taxes.

Intangible fixed assets:

Depreciation of intangible fixed assets is made on the straight-line method.

The depreciation method of software (for internal use) is computed on the straight-line method based on our expected useful period (5 years).

Long-term loans receivable:

Depreciation of long-term loans receivable is made on the straight-line method.

(e) Amortization of deferred charges

Deferred charges are equally amortized over 3 years.

(f) Translation of foreign currency assets and liabilities

Translation of foreign currency assets and liabilities are into yen at the exchange rate on the balance sheets date. The resulting exchange differences are accounted for as an exchange gain or loss.

(g) Allowances

Allowance for doubtful receivables:

In order to prepare against losses resulting from irrecoverable receivables, an allowance has been reserved in the amount required for estimated uncollectible receivables based on actual losses of trade receivables and on collectibility of specific receivables with loss possibilities.

Accrued bonuses:

To make preparations for the payment of bonuses to employees, accrued bonuses are shown based on the anticipated amounts of payment in the current term.

Allowance for bonuses to directors and corporate auditors:

To provide for payment of bonuses to directors and corporate auditors, the Company records an amount, based upon the estimated amount of payment for the current fiscal year.

Allowance for retirement benefits:

At the end of the current fiscal year, prepaid pension costs is included in others of investments and other assets.

Over the 5 years from the following term after the differences accrue, the Company will charge differences in mathematical calculation to expenses in accordance with the straight-line method.

Allowance for retirement benefits to executive officers:

To provide for payment of retirement allowance to executive officers, the estimated amount to be required according to our internal regulations as of the end of the period of the current fiscal year is shown.

Allowance for business restructuring losses:

Based upon the decision of the structural reform plan for its PC keyboard business and other key business and other key businesses, the Company has reported the reasonably estimated amounts of expected that it is expected to incur in the future.

(h) Accounting method of lease transactions

The accounting treatment for financial lease transactions other than those in which the ownership of leases is considered to be transferred to us, is in accordance with that for ordinary lease transactions.

(i) Accounting method of hedge transactions

(1) Method of hedge accounting

The Company adopts the allocation method to account for the forward exchange contracts for foreign currency-denominated receivables and payables, and the deferred hedge method to account for the forward exchange contracts for foreign currency-denominated anticipated transactions. The Company also adopts the special method to account for the interest rate swaps, which meet the requirements of special accounting.

(2) Hedging vehicles and hedged items

(Hedging vehicles)

Forward exchange contracts

Interest rate swaps

(Hedged items)

Monetary receivables and payables in foreign currency

Anticipated transactions in foreign currencies

Interest rates on borrowings

(3) Hedge policy

Under the guidance of its Finance Department, the Company makes forward exchange contracts to hedge risks in foreign exchange fluctuations arising from export and import transactions, and from lending in foreign currency. The Company also makes interest rate swaps to hedge fluctuation risks in interest rates on borrowings.

(4) Method of assessing hedge effectiveness

Regarding forward exchange contracts, the Company allocates them to monetary receivable and payable with same maturity and with same amounts in foreign currency, at closing of exchange contracts in accordance with the risk management policy. This completely ensures correlations reflecting subsequent exchange rate fluctuations. The Company assesses hedge effectiveness based upon such correlations.

Also, regarding interest rate swaps, the Company assesses hedge effectiveness based upon the fulfillment of the accounting requirements for special treatment.

(j) Other significant accounting policies

Consumption taxes
