(Adoption of International Financial Reporting Standards (IFRS))

Our Group have adopted International Financial Reporting Standards (hereinafter referred to as "IFRS") from the first quarter of the fiscal year ending March 31, 2019.

In addition, financial results for the third quarter of the previous fiscal year and for the previous fiscal year are also represented under the IFRS.

Our Group has set the date of transition to the IFRS as April 1, 2014 in the Registration Statement on Form F-4 (the "F-4") that our Group filed with the U.S. Securities and Exchange Commission (the "SEC") on November 14, 2016. Our Group has started to prepare its consolidated financial statements by adopting the IFRS since the consolidated fiscal year ended March 31, 2016. For this reason, the preparation of the consolidated financial statements for this consolidated fiscal year do not fall under a first-time adoption of the IFRS. Therefore, our Group did not prepare the reconciliations from the Japanese GAAP to the IFRS, which are required by IFRS 1 to be prepared upon the first-time adoption of the IFRS. The provisions regarding the first-time adoption, provided in IFRS 1, were adopted to the consolidated financial statements for the consolidated fiscal year ended March 31, 2016 in F-4, and the reconciliations from the Japanese GAAP to the IFRS have been prepared for the date of the transition to the IFRS, the consolidated fiscal year ended March 31, 2015, and the consolidated fiscal year ended March 31, 2016. A copy of the registration statement on F-4 can be reviewed and obtained on EDGAR, the SEC's Electric Data Gathering, Analysis, and Retrieval system.

1. Qualitative information related to the financial results for the quarter

Our Group have adopted the IFRS from the first quarter of this fiscal year ending March 31, 2019. Accordingly, for the purposes of comparative analysis, financial results for the third quarter of the previous fiscal year and for the previous fiscal year have been adjusted in line with the IFRS.

(1) Explanation of Operating Results

During the period under review (April 1, 2018 through December 31, 2018), the Japanese economy showed a gradual recovery, reflecting solid consumer spending and corporate earnings. However, there was increasing uncertainty over the future due to exchange rate fluctuations arising from trade friction between the United States and China and other such factors. The U.S. economy was strong against a backdrop of improving employment conditions, but there is increasing concern about future economic trends due to rising long-term interest rates, trade friction with China, and other developments. In Europe, there was an overall economic slowdown against a backdrop of increasing political instability as represented by Brexit and the demonstrations in France. In Asia, there was increasing uncertainty over the future of the Chinese economy due to decreased infrastructure spending and concern about further intensification of trade friction with the United States. Overall, there has been an economic slowdown in China.

Working against this backdrop, the MinebeaMitsumi Group concentrated on cutting costs, creating high-value-added products, developing new technologies, and enhancing its marketing approach to boost profitability further.

As a result, net sales were up 41,771 million yen (6.4 %) year on year to 698,938 million yen, the highest ever for the third quarter. Operating income was up 2,590 million yen (4.1%) year on year to 65,039 million yen, profit before income taxes was up 3,250 million yen (5.3 %) to 64,609 million yen, and profit for the period attributable to owners of the parent was up 2,521 million yen (5.2 %) to 51,033 million yen.

Performance by segment was as follows:

The main products in our Machined components segment include our anchor product line, ball bearings, in addition to mechanical components such as rod-end bearings used primarily in aircraft and hard disk drive (HDD) pivot assemblies, etc. as well as fasteners for aircraft. Sales of ball bearings increased as demand soared for energy-efficient models and safety devices in the automobile market and for fan motors, thereby raising sales volume. Rod-end bearing sales increased owing to favorable orders in the small and medium aircraft market. On the other hand, although our market share remains strong, pivot assembly sales were down due to decreased volume resulting from the negative impact of the shrinking HDD market.

As a result, net sales were up 13,637 million yen (10.6 %) year on year to 142,802 million yen, and operating income was up 6,076 million yen (19.6 %) to 37,063 million yen.

The core products of our Electronic devices and components segment include electronic devices (devices such as LED backlights for LCDs, sensing devices (measuring components), etc.), HDD spindle motors, stepping motors, DC motors, air movers (fan motors), precision motors, and special devices. Sales of stepping motors and other motors were up owing to favorable trends primarily in the automobile market. Demand for our LED backlights for LCDs that offer a technological advantage in thin devices remained strong, but sales were down due to the slowdown of smartphone demand.

As a result, net sales were down 56,688 million yen (-16.2 %) year on year to 293,552 million yen, and operating income was down 6,557 million yen (-28.5 %) to 16,480 million yen.

The main products in the MITSUMI business segment are semiconductor devices, optical devices, mechanical components, high frequency components and power supply components. Almost all products performed well, including game console and other mechanism components, switches, products for smartphones such as protection IC, antennas, communication modules and connectors. On the other hand, sales of camera actuators were down due to the slowdown of smartphone demand.

As a result, net sales were up 84,850 million yen (47.9 %) year on year to 262,103 million yen, and operating income was up 4,119 million yen (21.3 %) to 23,468 million yen.

Machines produced in-house are the main products in our Other business segment. Net sales were down 28 million yen (-5.4%) year on year to 481 million yen, and the operating loss increased 62 million yen year on year to total 162 million yen.

In addition to the figures noted above, 11,810 million yen in corporate expenses, etc. not belonging to any particular segment is indicated as adjustments. The total amount of adjustments was 10,824 million yen for the third quarter of the previous fiscal year.

## (2) Explanation of Financial Position

### 1. Assets, liabilities and equity

Our Group sees “strengthening our financial position” as a top priority and is taking various steps, such as efficient controlling capital investments, asset management, and reducing interest-bearing debt.

Total assets at the end of the third quarter were 778,713 million yen, up 75,155 million yen from the end of the previous fiscal year. The main reason for this uptick was an increase in cash and cash equivalents, trade and other receivables and property, plant and equipment.

Total liabilities at the end of the third quarter were 387,395 million yen, up 47,058 million yen from the end of the previous fiscal year. The main reason for this was an increase in trade and other payables.

Equity came to 391,318 million yen, bringing the equity ratio attributable to owners of the parent down 1.3 points from the end of the previous fiscal year to 49.3%.

### 2. Cash flows

Cash and cash equivalents at the end of the third quarter were 108,985 million yen, up 20,208 million yen from the end of the previous fiscal year.

Cash flows from various business activities for the first three quarters and other relevant factors are as follows:

Net cash provided by operating activities amounted to 68,519 million yen (compared to 57,773 million yen in the same period of the previous year). This was primarily due to increases and decreases in profit before income taxes, depreciation and amortization, trade and other receivables, inventories, and trade and other payables. Net cash used in investing activities amounted to 45,123 million yen (compared to 39,137 million yen in the same period of the previous year). This was primarily due to purchase of property, plant and equipment. Net cash provided in financing activities amounted to 3,285 million yen (compared to use of 16,562 million yen in the same period of the previous year). This was primarily due to increase and decrease in short-term borrowings, repayments of long-term borrowings, purchase of treasury stock and dividends paid.

## (3) Explanation of Consolidated Forecast and Other Forecasts

It is difficult to get a clear picture of where the global economy is headed from the fourth quarter of this fiscal year due to the trade policies of the United States and other countries, fluctuating exchange rates and geopolitical risks.

Moreover, a discrepancy has arisen between the initial forecast and actual sales of LED backlights for LCDs and camera actuators in conjunction with the rapid decline in smartphone demand.

Given this backdrop, we have reviewed our consolidated full-year forecast and made the following revisions based on our best estimate of current market conditions as well as our performance during the first nine-month period.

### Revisions to the full-year consolidated business forecast for the fiscal year ending March 31, 2019

(From April 1, 2018 to March 31, 2019)

	Net sales (millions of yen)	Operating income (millions of yen)	Profit for the period attributable to owners of the parent (millions of yen)
Previous forecast (A) (announced on November 7, 2018)	940,000	85,000	67,000
Revised forecast (B)	900,000	75,000	60,000
Difference (B-A)	(40,000)	(10,000)	(7,000)

Sharing profits with our shareholders is job one at MinebeaMitsumi. That's why our basic dividend policy gives priority to enhancing equity efficiency and improving returns to our shareholders. Dividends, while reflecting performance, are determined in light of the overall business environment and with an eye to maintaining a stable and continuous distribution of profits.

Working in line with our basic policy, we paid the interim dividend of 14 yen per share, up 1 yen over what it was last fiscal year. We also made a purchase of treasury stock in the amount of 10,632 million yen. While we plan to increase the year-end dividend 1 yen over what it was last fiscal year and make it 14 yen per share, we will finalize the amount in light of our performance for this fiscal year with the aim of achieving a consolidated-basis dividend payout ratio of around 20%.

(5) Notes on Condensed Quarterly Consolidated Financial Statements

(Notes on Going Concern Assumptions)

Not applicable.

(Change in Accounting Policy)

The significant accounting policies applied by our Group in this condensed quarterly financial statement are the same as those applied in the consolidated financial statements for the previous fiscal year, except for the following.

Income tax related to the condensed quarterly financial statements is calculated based on the estimated average annual effective tax rate.

Our Group has applied the following standards since the first quarter of this fiscal year.

	IFRS	Outline of establishment and amendment
IFRS 15	Revenue from Contracts with Customers	Amendment of accounting procedures for revenue recognition

We have adopted IFRS 15, "Revenue from Contracts with Customers" (released on May 2014) and "Clarifications to IFRS 15" (released on April 2016) (hereinafter, totally, "IFRS 15") since the first quarter of this fiscal year.

In accordance with the adoption of IFRS 15, we recognize revenue under the following five-step approach for contracts with customers, excluding interest and dividend income, etc. under IFRS 9 "Financial Instruments."

Step 1 : Identify the contract(s) with a customer

Step 2 : Identify the performance obligations in the contract

Step 3 : Determine the transaction price

Step 4 : Allocate the transaction price to the performance obligations in the contract

Step 5 : Recognise revenue when (or as) the entity satisfies a performance obligation

In applying IFRS 15, we have adopted the method of recognizing the cumulative effect of the adoption of this standard at the commencement date of adoption. The effect of this adoption on our Group's performance and financial position is immaterial.
