1. Qualitative information related to the financial results for the quarter

(1) Explanation of Operating Results

During the three months ended June 30, 2023, the Japanese economy saw a gradual economic recovery centered on personal consumption, as action restrictions were greatly eased in line with the classification change of COVID-19 to class 5. The U.S. economy continued to grow despite a slowdown due to continued interest rate hikes amid robust employment and personal consumption. In Europe, the future remains uncertain, as significant monetary tightening has become protracted against the backdrop of persistent upward pressure on prices, exerting downward pressure on the economy. The Chinese economy showed a recovery mainly in the service sector, which had been depressed until then due to the termination of the Zero Corona policy. On the other hand, the momentum of the economic recovery is slowing due to the slump in the manufacturing sector and real estate-related industries. In Southeast Asia, the economy remained steady as consumer spending recovered despite a downturn in exports.

Working against this backdrop, the MinebeaMitsumi Group (the "Group") is focusing on cutting costs, creating high-value-added products, developing new technologies, and enhancing its marketing approach to boost profitability further.

As a result, net sales were up 41,330 million yen (16.5%) year on year to 292,370 million yen. Operating income was down 8,176 million yen (-57.4%) year on year to 6,079 million yen, profit before income taxes was down 6,436 million yen (-45.1%) to 7,838 million yen, and profit for the period attributable to owners of the parent was down 7,073 million yen (-65.9%) to 3,661 million yen.

The above includes the profit and loss of HONDA TSUSHIN KOGYO CO., LTD. acquired on September 16, 2022 and Minebea AccessSolutions Inc. (former Honda Lock Mfg. Co., Ltd.) acquired on January 27, 2023.

Performance by segment was as follows:

The previous names of "Machined components segment", "Electronic devices and components segment", "MITSUMI business segment" and "U-Shin business segment" have been changed to "Precision Technologies segment", "Motor, Lighting & Sensing segment", "Semiconductor & Electronics segment", and "Access Solutions segment" respectively from the first quarter of the fiscal year. This change in the name of reportable segments has no impact on segment information.

In addition, as a result of the change in the corporate organization, some classification in "Other" and "Adjustments" have changed from the first quarter of the fiscal year. The segment information disclosed for the first quarter of the previous year has been prepared based on the classification of reporting segments after the corporate organization change.

The main products in Precision Technologies segment include our Group's anchor product line, ball bearings, in addition to mechanical components such as rod-end bearings used primarily in aircraft and hard disk drive (HDD) pivot assemblies, etc. as well as fasteners for aircraft. Sales of ball bearings, the Group's mainstay product, decreased mainly due to a decrease in demand for use in data centers, despite firm demand for use in automobiles. In addition, sales of pivot assemblies declined as demand for HDD applications did not recover, but sales of rod-end bearings increased due to a recovery in demand for aircraft-related products.

As a result, net sales were up 1,537 million yen (3.3%) year on year to 47,917 million yen, while operating income was down 1,989 million yen (-19.5%) to 8,209 million yen.

The main products of Motor, Lighting & Sensing segment include electronic devices (devices such as LED backlights for LCDs, sensing devices (measuring components), etc.), HDD spindle motors, stepping motors, DC motors, air movers, and special devices. Sales increased mainly due to an increase in demand for automotive motors.

As a result, net sales were up 6,348 million yen (7.8%) year on year to 87,794 million yen, and operating income was up 1,611 million yen (810.4%) to 1,808 million yen.

The main products in Semiconductor & Electronics segment are semiconductor devices, optical devices, mechanical components, power supply components, and smart products. Net sales were down, primarily due a decreased demand for optical devices for camera actuators.

As a result, net sales were down 5,084 million yen (-5.9%) year on year to 81,730 million yen, and operating income was down 8,595 million yen (-94.2%) to 529 million yen.

The main products of Access Solutions segment are key sets, door latches, door handles, and other automotive components as well as industrial equipment components. In addition to the business integration of Minebea AccessSolutions Inc., net sales were up owing to increased demand resulting from a recovery in automobile production.

As a result, net sales were up 37,610 million yen (104.4%) year on year to 73,648 million yen, and operating income was down 160 million yen for an operating loss of 502 million yen.

Software design, development, and machines produced in-house are the main products in our Other business segment. Net sales were up 919 million yen (253.3%) year on year to 1,281 million yen, and the operating loss was 20 million yen, an improvement of 58 million yen.

In addition to the figures noted above, 3,945 million yen in corporate expenses, etc. not belonging to any particular segment is indicated as adjustments. The total amount of adjustments was 4,844 million yen for the same period of the

previous fiscal year.

(2) Explanation of Financial Position

1. Basic approach to financial strategy and capitalization

Our Group sees “strengthening our financial position” as a top priority and is taking various steps, such as efficient controlling of capital investments, asset management, and reducing interest-bearing debt. We will reform our portfolio to increase the weight of our highly profitable core businesses and engage in highly effective M&A, promoting an appropriate and flexible financial strategy.

2. Assets, liabilities and equity

Total assets at the end of the first quarter were 1,360,317 million yen, up 56,350 million yen from the end of the previous fiscal year. The main reason for this was an increase in inventories and property, plant and equipment.

Total liabilities at the end of the first quarter were 694,941 million yen, up 34,283 million yen from the end of the previous fiscal year. The main reason for this was an increase in trade and other payables.

Equity came to 665,376 million yen, bringing the equity ratio attributable to owners of the parent down 0.3 percentage points from the end of the previous fiscal year to 48.2%.

3. Cash flows

Cash and cash equivalents at the end of the first quarter were 156,245 million yen, up 11,574 million yen from the end of the previous fiscal year.

Cash flows from various business activities during the first three months and relevant factors were as follows:

Net cash provided in operating activities came to 33,664 million yen (compared to 7,314 million yen used by operating activities in the same period of the previous year). This was primarily due to profit before income taxes, and increases and decreases in trade and other receivables, in inventories and in trade and other payables, etc. Net cash used in investing activities came to 17,705 million yen (compared to 77,961 million yen in the same period of the previous year). This was primarily due to purchase of property, plant and equipment, etc. Net cash used by financing activities came to 10,123 million yen (compared to 55,669 million yen provided in financing activities in the same period of the previous year). This was primarily due to dividends paid, etc.

(3) Explanation of Consolidated Forecast and Other Forecasts

The full-year consolidated business forecast for the fiscal year ending March 31, 2024 remains unchanged from the announcement with the brief report of financial results provided on May 11, 2023.

	<u>Six months ending Sep. 30, 2023</u>	<u>Year ending Mar. 31, 2024</u>
Net sales	663,000million yen (14.1%)	1,450,000million yen (12.2%)
Operating income	28,000million yen (-31.1%)	95,000million yen (-6.4%)
Profit for the year attributable to owners of the parent	20,000million yen (-35.1%)	70,000million yen (-9.1%)

(): Changes from corresponding period of previous fiscal year

(4) Basic Policy for Profit Sharing and Dividend for the Current Fiscal Year

Sharing profits with our Group's shareholders is first priority for MinebeaMitsumi (the "Company"). That is why its basic dividend policy gives priority to enhancing equity efficiency and improving returns to our shareholders. Dividends, while reflecting performance, are determined in light of the overall business environment and with an eye to maintaining a stable and continuous distribution of profits.

Based on the basic policy above, in the previous fiscal year, we provided an interim dividend of 20 yen and a year-end dividend of 20 yen, bringing the annual dividend to 40 yen per share, an increase of 4 yen per share from the fiscal year ended March 31, 2022.

The interim and year-end dividends for the fiscal year under review will be decided at a later date aiming for a consolidated dividends payout ratio of around 20%.
