

Outlook for Fiscal 2007

The global economy is expected to remain firm in fiscal 2007, although concerns remain regarding further increases in prices for crude oil and raw materials, fluctuating foreign currency exchange rates against the Japanese yen and other Asian currencies, domestic interest rate hikes and intensifying competition both in Japan and overseas. The market for electronic components is expected to move toward a correction. In contrast, the markets for information and telecommunications equipment and home electrical appliances are expected to continue growing, while demand from the automobile and aerospace industries is expected to expand. In this environment, we will focus on expansion by investing intensively in growth businesses and implementing measures aimed at reinforcing our operating foundation. In light of these circumstances, as of the end of fiscal 2006 we forecast consolidated net sales of ¥310,000 million, operating income of ¥25,000 million and net income of ¥10,000 million in fiscal 2007.

Risk Management

Minebea recognizes a variety of risks and uncertainties that have the potential to affect its operating results and/or financial position. As of June 29, 2006, the date of Minebea's Japanese-language *yuka shoken hokokusho*, the filing of which is required of all publicly traded companies under Japan's Securities and Exchange Law, Minebea recognized the following risks.

Market Risk

Principal markets for Minebea products, including those for PCs and peripheral equipment, information and telecommunications equipment and household electrical appliances, are intensely competitive and subject to significant fluctuations in demand. Accordingly, our operating results and financial position are vulnerable to sudden fluctuations in demand and changes in our customers' product requirements.

Foreign Exchange Risk

A significant portion of our consolidated net sales are in markets outside of Japan. Our business is thus vulnerable to risks associated with fluctuations in foreign currency exchange rates. We have entered into various currency exchange contracts and other derivatives transactions to hedge these risks, but fluctuations in foreign currency exchange rates may affect our operating results and/or financial position over the long term.

R&D Risk

With the aim of introducing a constant stream of new, high-quality products, we conduct extensive R&D. Nonetheless, there is no guarantee that R&D efforts will come to fruition. Accordingly, we are subject to the risk that significant R&D expenditures may not be rewarded with successful products.

Litigation Risk

The Legal Department is responsible for managing risk related to lawsuits and other legal actions brought against our operations in Japan and/or overseas. However, we are subject to the risk that lawsuits or other actions with the potential to affect our operating results and/or financial position may be brought against us in the future.

Risk Related to Price Negotiations

We continue to face intense competition from lower-priced products manufactured in other countries and regions. Accordingly, we are subject to the risk that we will be unable to maintain or increase our share should market needs shift to low-quality, low-priced products.

Risk Related to Raw Materials and Logistics Costs

We purchase a variety of materials from external suppliers. While we strive to ensure optimal inventory volumes for such materials and access to stable supplies of materials with stable prices. However, we are subject to the risk that rising prices for such materials may affect our operating results and/or financial position.

Latent Risk Related to Operations Overseas

The Minebea Group's manufacturing activities are conducted primarily in Thailand, China and Singapore. While considerable time has passed since we established operations in these countries, and while we continue to promote the integration of these operations, our operations overseas are subject to a number of risks that may have a negative impact on our operating results and/or financial position. These include unexpected changes to laws or regulations, difficulty in attracting and securing appropriate human resources, and acts of terrorism or war, or other acts that may cause social disruption.
