

# Internal Control Report

## 1. Framework of Internal Control Over Financial Reporting

The management of Minebea Co., Ltd., is responsible for the design and operation of the internal control over financial reporting (“ICOFR”) that is performed by Minebea Co., Ltd. as well as that performed by its consolidated subsidiaries and affiliated company accounted for under the equity method (collectively “Minebea Group”). Therefore, in accordance with the report “On the Setting of the Standards and Practice Standards for Management Assessments and Audit Concerning Internal Control Over Financial Reporting (Council Opinions)” (issued by the Business Accounting Council on February 15, 2007), management ensures that processes include basic internal control elements and are designed and operated appropriately in compliance with the basic framework of internal control, and also that the information contained in financial reports prepared by the Minebea Group is both appropriate and reliable.

However, internal control may not function effectively in cases where errors in judgment are made, there is carelessness or when a group of employees conspire to thwart said control. Furthermore, internal control may not apply in the event of unforeseeable changes to internal or external environments or for irregular transactions. For these reasons internal control of financial reporting is not absolutely effective in achieving its purposes and may not always be able to prevent or discover material misstatements contained in financial reports.

## 2. Assessment Scope, Timing and Procedures

### Basis of Presenting Internal Control Report

The report on ICOFR of the consolidated financial statements of Minebea Co., Ltd. (“Internal Control Report”) is prepared on the basis of generally accepted assessment standards of internal control over financial reporting in Japan (“Assessment Standards”) and is compiled from the Internal Control Report prepared by Minebea Co., Ltd. as required by the Financial Instruments and Exchange Law of Japan (“Law”).

The Assessment Standards require management to assess the ICOFR, which consists of the internal control over the consolidated/parent-only financial statements included in the Annual Securities Report filed under the Law and the internal control over disclosure information and others included in the Annual Securities Report that materially affects the reliability of the financial statements.

The scope of management’s assessment of ICOFR in this annual report is different from the scope required by the Assessment Standards. Management assessment of ICOFR for this annual report covers the ICOFR with respect to the accompanying consolidated financial statements only. In addition, as explained in Note 1 on the basis of financial statement presentation, the accompanying consolidated financial statements are reclassified and additional information are provided from the consolidated financial statements prepared for the purpose of the Law. The process of making reclassifications and the addition of certain information is for the convenience of readers outside Japan. Management voluntarily includes the process in its assessment of ICOFR, even though it is outside the scope of the Assessment Standards.

### Scope of Assessment

The reference date for the assessment of ICOFR was March 31, 2010, the end of the current fiscal year, and the assessment of the Minebea Group was carried out based on the Assessment Standards.

The basic assessment procedures consisted of providing relevant personnel with questionnaire sheets and checklists after analyzing and understanding the details of both internal control with a significant impact on all consolidated financial reporting (“entity-level internal control”) and internal control over accounting and financial reporting process; collecting their replies; making further inquiries to relevant personnel based on the answers to the questionnaires and checklists; inspecting relevant documents and verifying related records; and then selecting internal control incorporated into process in order to be performed simultaneously with the implementation of said process (“process-level internal control”) to be assessed based on those results.

In order to assess the effectiveness of the process-level internal control described above, the details of the processes subject to assessment were first examined for the purpose of proper understanding and analysis. Key controls that were considered to have significant influence to the reliability of financial reporting were then identified and the design and operation statuses of those key controls were assessed accordingly.

For the scope of evaluation for ICOFR, assessment was carried out on entity-level internal control and internal control over accounting and financial reporting process which have a significant effect on the Minebea Group’s consolidated financial reporting and for which it was considered appropriate to carry out assessment of design and operation status from a entity-level standpoint. This assessment was carried out at all of our business locations.

For the scope of assessment for process-level internal control, 9 of our business locations were identified as significant business locations by using the accumulated data of each companies prior to consolidation elimination of the previous fiscal year and setting “total assets”, “net assets”, “sales” and “income before income taxes and minority interests” as selection indicators which showed that these 9 business locations made up approximately 70% or greater of the above accumulated data for the selection indicators. Then, processes which affect sales, accounts receivables and inventories, which are the accounts closely associated with Minebea Group’s business objectives, were assessed for these 9 business locations.

In addition, by considering the impact to the consolidated financial reporting, other significant processes were also included in the assessment.

## 3. Results of Assessment

Management concluded that as of March 31, 2010, ICOFR of the Minebea Group was effective.
