Chapter I Value Creation Story of MinebeaMitsumi

MinebeaMitsumi Current

With the world's No. 1 product groups, demonstrating strengths that cannot be found in other companies

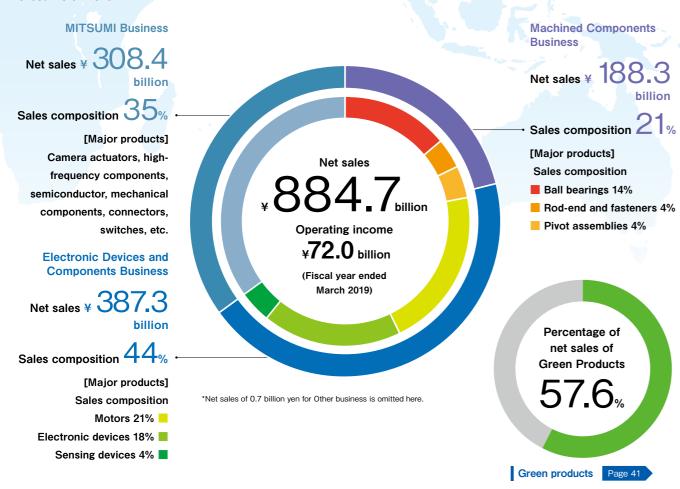

MinebeaMitsumi has the largest share of the global market for miniature and small-sized ball bearings with an external diameter of 22 mm or smaller at 60%.

In addition, in the field of miniature and small-sized ball bearings we have cultivated ultra-precision machining technologies and mass production technologies that we apply in various other fields to create ultra-high quality products in the global market as a one-of-a-kind manufacturer.

Bearings made using ultra-precision machining technology reduce friction and resistance, increasing the efficiency and product life of all kinds of "moving parts" and contributing to energy saving.

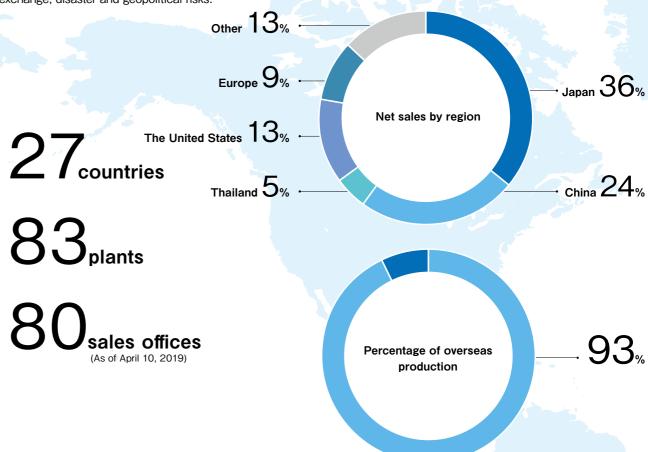

Ultra-high quality product group

Conglomerate premium succeeded, and net sales, operating income and profit for the year all reached record highs in the fiscal year ended March 2019.

Creating high-quality products in the global market

We created a global system for production and sales, responded to local production and local consumption, and reduced exchange, disaster and geopolitical risks.

The World's No. 1 share

Miniature & small-sized ball bearings

60%

Rod-end bearings for aircraft

Pivot assemblies for hard disk drive (HDD)

1-cell Lithium-ion Battery Protection IC

Major plants Pages 35 to 3

The World's smallest

Miniature ball bearings

External diameter 1.5mm

The world's smallest class stepping motors

The world's smallest class tactile switches

Light guide plates for LED backlights for LCDs

The World's

thinnest
