

60th Business Term Semiannual Business Report

Minebea

Minebea Co., Ltd.

April 1, 2005 ▶ September 30, 2005

Local Code No.6479

To Our Shareholders (Translation)

The Business results for the 60th Business Term will be reported at our Ordinary General Meeting of Shareholders scheduled to be held in June 2006. The Business results for the current interim term (April 1, 2005 – September 30, 2005) are as follows.

■ Overview of the half year

During the current consolidated interim term, the Japanese economy almost put an end to inventory adjustments in information technology and continued to recover, supported by solid personal consumption and strong capital investment, although it was adversely affected by soaring crude oil prices and materials prices. In the U.S., although adversely affected by natural disasters and subsequent re-ascending crude oil prices, the economy put an end to inventory adjustments in the corporate sector and continued to grow firmly, powered by steadily improved employment and income environments in the household sector. The European economy, although weakness remained in some sectors, generally showed signs of turnaround and grew moderately. The Chinese economy, meanwhile, maintained high growth owing primarily to strong exports, although investment was slowed by tight constraints on overheated investment. The Southeast Asian economies stayed firm due to continued growth in the U.S. economy and high growth in China.

Under these circumstances, we strove to make our profitable basis stronger in order to further enhance earnings in a short period of time by addressing such near-term strategic agenda as resolutely carrying out structural reforms; reinforcing R&D efforts; and driving for management with a clear future vision. At the same time, we also concentrated on further reducing costs; developing high value-added products and new technologies; and expanding marketing activities.

As a result, net sales increased 8,988 million yen (6.1%) year

on year, to 155,739 million yen, operating income also increased 1,756 million yen (32.1%) year on year, to 7,224 million yen. Ordinary income increased 1,437 million yen (37.0%), to 5,322 million yen, and net income also increased 1,326 million yen (121.1%) year on year, to 2,421 million yen. In the current consolidated interim term, we introduced accounting for impairment of fixed assets and reported an extraordinary loss of 803 million yen.

■ Outlook for the current fiscal year

The Japanese economy will continue to grow at a moderate pace, unless there are further increases in crude oil prices and confusions in the American and Chinese economies. In China, although we have to pay attention to movements in its tight monetary policy and other economic factors, the economy will maintain a high growth rate. In the U.S. too, self-sustaining growth is expected, although there are concerns about the effect of soaring crude oil prices on consumer spending and other negative factors. We expect that the world economy will continue to stay on a well-balance growth path.

An organizational change effective July 1, 2005 has been carried out. We will integrate our two separated Manufacturing and Sales Headquarters into Business Units, and at the same time, establish headquarters that will indirectly support the Business Units. With the new Business Units and Headquarters, we will resolutely carry out decisive structural reforms, reinforce R&D and promote management with a clear vision in order to improve profitability. We will, through these structural changes, focus on profit improvement in the three businesses of HDD spindle motors, information motors and PC keyboards. We will also endeavor to aim for more profits through further sales growth and reinforced competitiveness in bearings and bearing-related businesses. To establish a profitable base in the future, we will also deploy the display

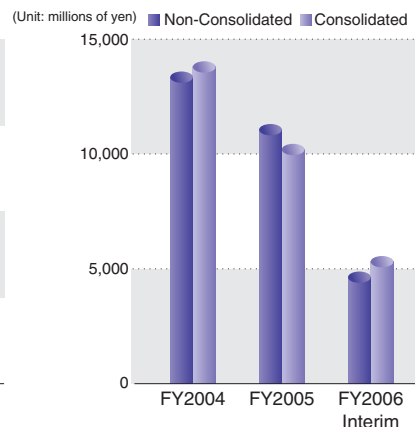

■ Net Sales

■ Operating Income

■ Ordinary Income

peripheral business, etc. toward its growth by focusing on high value-added products.

Outlook by business segment for the full year is as follows:

◆ **Machined components business**

We will continue to aggressively expand sales of mainstay ball bearings in firm demand to manufacturers of household electrical appliances, automobiles and information & telecommunications equipment. We can expect further cost reductions through economies of scale in manufacturing from this sales expansion, by which we will aim to achieve further improvement in performance. In addition, in rod-end bearings, we can expect benefits from the strong aircraft market, particularly in Europe and the U.S. In pivot assemblies, we expect that sales will be strong.

◆ **Electronic devices and components business**

Information motors: The sure effect of further business restructuring measures in addition to product mix reviews is expected to show up. **Spindle motors:** The drastic cost reduction measures that we are implementing are taking effect. **PC keyboards:** Although there is some delay in the production transfer to Shanghai from Thailand, results improvement is expected, owing primarily to cost reduction measures and reviews of the sales prices of products with higher material costs. **LCD back lights:** Owing to high growth and high profitability expected, we will aggressively introduce new products to the markets. **Measuring components:** Sales of this product is expected to remain strong.

We intend to enhance and further expand our manufacturing and sales, and improve our business results.
We look forward to your continuous support and guidance.

T. Yamagishi

Takayuki Yamagishi
Representative Director
December 2005

■ **Net Income**

■ **Total Assets**

■ **Shareholders' Equity**

Performance by Business Segment (on a Consolidated Basis)

Machined Components Business

- Net sales in this business segment increased. Sales of pivot assemblies grew significantly as brisk demand for HDDs continued. Sales of rod-end & spherical bearings for use in aircraft also remained strong.
- Strong sales of principal products pushed up operating income.

Net sales in this business segment increased 4,854 million yen (8.5%) from the same period of last fiscal year, to 62,204 million yen. Principal businesses were strong on the back of expanding demand for information & telecommunications equipment and steady economic growth both at home and abroad during the first half of the year. Sales of mainstay miniature and small-sized ball bearings remained high, owing to strong markets for information & telecommunications equipment and automobiles. Rod-end & spherical bearings sales also increased, due to brisk demand from the aerospace industry, our main customer base. In the pivot assembly business, sales grew, led by growing demand for HDDs.

Operating income from the machined component business rose 634 million yen (6.1%) from the same period last year, to 11,112 million yen. Compared with the same period a year ago, although we were adversely affected by steep rises in steel and other raw material prices, we strove to reduce production costs by enhancing production efficiencies. In addition, we also expanded profits by boosting production. In particular, rod-end & spherical bearings posted higher profit. In the pivot assembly business, profit expanded, due to increased volumes and the implementation of efficiency improvement measures.

■ Changes in Net Sales and Operating Income (Industry)

Electronic Devices and Components Business

- Net sales of LED backlights for LCDs, information motors (Minebea-Matsushita Motor joint venture) and PC keyboards increased.
- Operating loss fell, owing to better HDD spindle motor results and higher profit from LED backlights for LCDs.

Net sales in this business segment increased 4,135 million yen (4.6%) from the same period of last fiscal year, to 93,535 million yen. In the lighting device business that centers on LED backlight assemblies for LCDs, sales grew considerably year on year, due to brisk demand for mobile telephone handsets and increases in the number of models adopting our backlights. Sales of fan motors for use in PC keyboards and information motors (Minebea-Matsushita Motor joint venture) also rose, due to expanding demand for PCs. As for HDD spindle motors, sales leveled off, due to a focus on lowering costs while maintaining production and shipment volumes at a certain level since July.

Operating loss from the electronic device and component business was 3,887 million yen, a reduction of 1,123 million yen from a year ago. Compared to the same period last year, income from lighting devices increased, due to increased production and enhanced productivity. Regarding the three businesses that face a challenge in profitability improvement, the HDD spindle motor business improved, owing to successful cost reduction measures. In the information motor business, we expect improvements ahead as a major structural reform, including reduction in personnel, ended at the end of September. In the PC keyboard business, although profit improvements were hindered by soaring raw material costs, we expect the integrated production to take effect in the months ahead, with the production transfer to Shanghai from Thailand almost ending in September.

Performance by Geographical Segment (on a Consolidated Basis)

■ Japan

Net sales increased 990 million yen (2.6%) year on year, to 39,241 million yen. However, due to restructuring in our information motors business, operating income fell 906 million yen to (754) million yen.

■ Asia excluding Japan

This region includes Greater China region which continues high growth due to vigorous investment, and is an important manufacturing base for manufacturers of Japan, Europe, America and other countries. Sales mainly in the Greater China region were firm owing mainly to the expansion of demand from the information & telecommunications equipment industry and steady demand from the household electrical appliance industry. On the profit side, the effect of improvement in profitability has been showing up, owing primarily to price increases and cost reductions for such mechanical components as pivot assemblies, measures implemented to decrease the costs of HDD spindle motors and progress in the ongoing structural reform initiatives in the information motors business segment. As a consequence, compared with the interim period a year earlier, net sales increased 6,419 million yen (9.3%), to 75,334 million yen, and operating income climbed 2,893 million yen (102.0%) to 5,729 million yen.

■ North America

Despite progress in production shift by our information & telecommunications equipment-related customers to Asia, sales of PC keyboards and other electronic devices and components were firm in this region. In addition, in ball bearings manufactured in the U.S. and rod-end bearings for sales to aviation-related and other industries, both demand and sales were brisk. As a result, net sales rose 2,879 million yen (11.1%) year on year, to 28,803 million yen, whereas operating income fell 769 million yen (-33.7%) to 1,515 million yen, partly due to some changes in import purchase prices.

■ Europe

Sales of ball bearings, rod-end bearings and other products were firm as moderate economic growth was seen in this region. But due to the transfer of PC keyboard sales to U.S. customers to North America, net sales fell 1,299 million yen (-9.5%) year on year, to 12,360 million yen, while operating income climbed 539 million yen (276.4%), to 734 million yen.

Development of New LED Backlight System

Minebea Co., Ltd. (hereinafter "Company") has successfully developed a new LED backlight system featuring high luminance, high efficiency and ultra thinness - with the cooperation of an LED maker (Nichia Corporation).

Liquid crystal displays (LCDs) are in strong demand these days - for use in such products as cellular phones, car navigation systems and TV sets. Contributing to this surge in demand is the recent advances in this product. Backlight systems are integral to LCDs - components that cannot generate light on their own. The markets seek backlight systems featuring high luminance, high efficiency and thinness.

The recently developed backlight system responds to these strong market needs. The Company has re-engineered the conventional relationship between the LEDs and the light guide plates to develop a new conceptual LED and the backlight system.

The Company has developed and manufactured backlight systems for mobile products using white LEDs - such as cellular phones, digital cameras and PDAs. The new LED backlight system is a combined development achievement of the Company's proprietary optical design skills, ultra-precision tool machining capabilities and high-precision injection molding technologies. The Company has started the mass production of this new backlight system since October 2005.

The main features of the new product are as follows:

1. Compared with the conventional designs, the new product achieves a 20% improvement in LED luminescence efficiency and the luminous efficiency of 76lm/W.
2. The new product raises the flexibility of LED arrangement. For about 2-inch sizes, it is usable with an LED lamp. Use of multiple LEDs can further raise luminance.
3. The height of the new LED is 0.5mm, the industry's thinnest. The thickness of the light guide plate is 0.6mm for standard items, but it can be reduced to 0.4mm.

What do you need to do to sell or buy your less-than-one-unit shares?

Normally, you cannot sell or buy your less-than-one-unit shares (less than 1,000 shares) on the equity market. To sell or buy such shares, you need to submit a demand for purchase or a demand for sale of the shares to turn your shares into a unit share.

For inquiries, please contact the Stock Transfer Agency Department of Sumitomo Trust & Banking Co., Ltd. In case you use stock certificate depository system, please contact the securities company that you deal with.

(Example for purchasing shares)

Less-than-one-unit shares that you hold 700 shares + Less-than-one-unit shares that you purchase 300 shares = 1 unit share 1,000 shares

**For inquiries, contact The Sumitomo Trust & Banking Co., Ltd.
Stock Transfer Agency Department ☎ 0120-176-417**

We recommend that you receive your stock dividends through a bank transfer.

You can easily forget to receive your stock dividends by a mail transfer payment notice. We recommend you choose to receive your stock dividends through a safe, reliable bank transfer. For further details, please contact the corporate agency department of Sumitomo Trust & Banking Co., Ltd.
